The Council — AIMS Roles, Competence, Awareness and Communications Plan

AIG-AIMS-04 · v1.3 draft · Draft for Council review · OFFICIAL · ISO/IEC 42001:2023

Purpose: operationalise accountable AIMS roles, required competence, learning and internal/external communications without changing Council delegations or specialist authority.

Status statement: all appointments, deputies, authority mappings, competence requirements, training modules and communications are proposed. No individual is confirmed competent, trained or authorised until the Council approves the design and retains evidence.

Document control	Controlled value
Document ID	AIG-AIMS-04
Version	1.3 draft
Status	Draft for Council review
Document owner	AI Governance Lead
Approving authority	To be confirmed under Council delegations
Effective date	Pending formal approval
Review frequency	At least annually and on material change
Primary authority source	AIG-GOV-06 Terms of Reference; approved Council delegations prevail
Implementation source	AIG-AIMS-03 IMP-05 and IMP-09
Classification	OFFICIAL

Role readiness	
Measure	Result
Defined role/body records	20
Appointments confirmed	0
Deputies recorded	0
Appointment evidence recorded	0
Roles reviewed	0
Role records QA complete	20

Competence and learning readiness	
Measure	Result
Role groups mapped	13
Current assessments complete	0
Open competence gaps (assessed gap /	0
Learning modules designed	12
Approved / active modules	0
Average completion	0%
Learning records QA complete	12

Communications readiness	
Measure	Result
Communication activities	13
Approved / active	0
Issued / completed	0
Target dates recorded	0
Last-issued dates recorded	0
Communication QA complete	13

Important control distinction
1. A role description does not appoint a person.
2. Training completion does not by itself prove competence.
3. Competence does not itself confer delegated authority.
4. Communication activity needs retained evidence and an effectiveness measure.
5. AIG-GOV-06 and approved Council delegations remain the authority source.
6. Specialist/statutory functions retain their existing authority.
7. Draft entries must not be represented as operating controls.

Controlled implementation sequence
1. Approve the Terms of Reference, delegations, retained specialist authority and the role design in this workbook.
2. Name role holders and deputies; retain appointment, conflict and authority evidence.

3. Confirm target populations, required competency profiles, resources and assessment methods.
4. Approve learning content, delivery owners, dates, accessibility, pass criteria and LMS/evidence arrangements.
5. Assess role holders; record competence conclusions, gaps, supervised practice and remedial actions.
6. Approve and issue communications in sequence with AIMS adoption and operational rollout.
7. Review training, communication and role effectiveness using incidents, audit, performance and stakeholder feedback.

Version	Date	Change	Author / owner
1.0 draft	07/08/2026	Initial AIMS role-accountability, competence, learning, awareness and communications design aligned to AIG-GOV-06, AIG-OPS-01 and AIG-AIMS-03.	AI Governance Lead
1.1 draft	28 September 2026	Make role-accountability QA colours match exact statuses.

1.3 draft	12 October 2026	v3.9.10: Role Accountability adds ROL-20 Data Steward, who maintai	AI Governance Lead

The Council — AIMS Role Accountability and Appointment Register

AIG-AIMS-04 · v1.3 draft · Draft for Council review · OFFICIAL · ISO/IEC 42001:2023

Purpose: define proposed accountability, responsibilities, authority boundaries, interfaces, competence and appointment evidence for AIMS roles and bodies.

Current position: role descriptions are proposed design only. Complete named appointment, deputy, evidence and review fields only after formal authority is confirmed; approved Council delegations and specialist responsibilities prevail.

Role ID	Role / body	AIMS layer	Purpose / accountability	Key responsibilities	Decision / approval authority	Consultation / escalation	Named appointee	Deputy	Appointment status	Appointment evidence	Required competency level	Training pathway	Review date	Related suite references	ISO / SoA links	Role record / source	Record QA
ROL-01	Executive Sponsor	Strategic oversight	Senior accountability, sponsorship and resources for the AIMS.	Champion responsible AI; secure adoption and resources; hold leadership to account; resolve strategic barriers; receive escalations and management-review outputs.	Sponsors formal adoption and decisions reserved under Council delegations; does not replace statutory or specialist authority.	Escalate critical matters to Executive Leadership and the AI Assurance Board; consult Monitoring Officer, SIRO, DPO and other control owners.			Proposed		Level 5 — AI Governance Leader	TRN-01, TRN-03, TRN-09, TRN-10		AIG-GOV-02, AIG-OPS-05, AIG-OPS-06, AIG-GOV-08, AIG-AIMS-01, AIG-AIMS-03	ISO 5.1, 5.3, 7.1; A.2.2, A.3.2	AIG-GOV-06 proposed governance; Playbook roles	Complete
ROL-02	AI Assurance Board	Strategic oversight	Collective strategic oversight and higher-risk decision-making.	Provide assurance and endorsement on strategic direction and higher-risk cases; oversee risk, performance, exceptions and improvement; sponsor management review and assurance	Proposed: Assurance and endorsement of high-risk cases, with approval remaining with the relevant delivery forum under delegation; Critical escalated to Executive	Receives Working Group recommendations and critical escalations; refers specialist matters to the relevant accountable function.			Proposed		Level 5 — AI Governance Leader	TRN-01, TRN-09, TRN-10		AIG-DEC-03, AIG-OPS-05, AIG-OPS-06, AIG-GOV-08, AIG-AIMS-01, AIG-AIMS-03	ISO 5.1, 5.3, 9.3; A.3.2	AIG-GOV-06 Terms of Reference	Complete
ROL-03	AI Governance Working Group	Operational governance	Cross-functional coordination, triage and medium-risk assurance.	Coordinate intake, AGPI, register and assessments; scrutinise evidence; assure and recommend on medium-risk cases; recommend high/critical decisions; track conditions and actions.	Proposed: Assurance and recommendation on medium-risk cases, with approval remaining with the relevant delivery forum under delegation; recommends High/Critical	Escalates High to the Board and Critical to Board/Executive Sponsor; involves control functions wherever their authority is engaged.			Proposed		Level 4 — AI Specialist	TRN-01, TRN-04, TRN-05, TRN-09, TRN-10		AIG-INV-03, AIG-INV-04, AIG-ASS-01, AIG-ASS-02, AIG-ASS-03 and AIG-ASS-04, AIG-DEC-03, AIG-GOV-06.	ISO 5.3, 8.1; A.3.2	AIG-GOV-06 Terms of Reference	Complete
ROL-04	AI Assurance Board Chair	Strategic and operational interface	Lead the Council's AI direction and chair strategic governance.	Set direction; chair the Board; sponsor coherent prioritisation; ensure decisions and escalations reach the correct authority; promote capability and responsible innovation.	Chairing and recommendation authority only until delegations and Terms of Reference are formally approved. Chair to be confirmed by the Council (proposed)	Works with Executive Sponsor and AI Governance Lead; escalates authority, resource and systemic-risk issues.			Proposed		Level 5 — AI Governance Leader	TRN-01, TRN-03, TRN-09, TRN-10		AIG-GOV-02, AIG-OPS-05, AIG-OPS-06, AIG-GOV-08, AIG-AIMS-01	ISO 5.1, 5.3, 7.4; A.3.2	Playbook governance roles; AIG-GOV-06	Complete
ROL-05	AI Governance Lead	AIMS management	Operate and continually improve the AIMS on behalf of accountable leadership.	Maintain scope, policy, SoA, registers, triage, governance workflow, metrics, evidence, training design, reporting, audits, management review and corrective actions.	Process administration and recommendation authority; no independent power to approve cases or accept risk outside confirmed delegation.	Escalates material risks, overdue actions, exceptions and evidence gaps to the relevant owner, Working Group, Board or Executive Sponsor.			Proposed		Level 5 — AI Governance Leader	TRN-01 to TRN-12 as applicable		AIG-GOV-01 to AIG-GOV-03, AIG-GOV-06, AIG-INV-01, AIG-INV-03, AIG-INV-04, AIG-ASS-01 to AIG-ASS-04	ISO 4.4, 5.3, 7.2-7.5, 9-10; A.3.2	Playbook roles; AIG-GOV-06 and AIG-AIMS-03 IMP-05/IMP-09	Complete
ROL-06	Governance Secretariat	Operational governance	Maintain reliable governance records and action tracking.	Schedule meetings; manage agendas, papers, conflicts, minutes, decisions, conditions, action logs and links to the AI Register and its Evidence index.	Administrative control only; cannot approve cases, close conditions or vary recorded decisions without authorised instruction.	Escalates missing papers, overdue actions, conflicts and decision-record inconsistencies to the Chair and AI Governance Lead.			Proposed		Level 2 — AI User / Practitioner	TRN-01, TRN-04, TRN-09		AIG-INV-04, AIG-DEC-03, AIG-OPS-05, AIG-GOV-06	ISO 7.5; A.3.2, A.6.2.3	AIG-GOV-06 secretariat responsibilities	Complete
ROL-07	Service Owner	Service accountability	Accountable owner for service outcomes and proportionate governance of an AI use.	Register the use; ensure assessments and controls; own risk and benefits; resource human oversight; approve operational procedures; monitor performance; report incidents and material change.	Proposed: Low-risk decision by the officer or forum with confirmed delegation (Service Owner/Service Manager only if delegated), recorded in AIG-DEC-03 or approved minutes; the AI Register records the reference. Cannot	Escalates Medium/High/Critical cases and unresolved specialist findings; consults users and affected groups proportionately.			Proposed		Level 3 — AI Owner / Manager	TRN-01, TRN-03, TRN-04, TRN-05, TRN-10		AIG-INV-03, AIG-INV-04, AIG-ASS-01, AIG-ASS-02, AIG-ASS-03, AIG-ASS-04, AIG-ASS-05, AIG-ASS-08 and AIG-ASS-07, AIG-DEC-03, AIG-OPS-	ISO 5.3, 8.1; A.5.4, A.9.2	Playbook Service Owner; AIG-GOV-06 decision rights	Complete
ROL-08	AI System Owner / Operational Lead	Operational delivery	Day-to-day accountability for safe, controlled system operation.	Maintain operating instructions, oversight, monitoring, access, logs, changes, thresholds, incidents, continuity and retirement evidence; keep the Service Owner informed.	Operational action within approved limits; may pause or invoke rollback where authorised by the deployment/incident plan.	Escalates threshold breaches, unapproved change, incidents, complaints and control failure to Service Owner and relevant specialists.			Proposed		Level 3 — AI Owner / Manager	TRN-01, TRN-02, TRN-04, TRN-10, TRN-11		AIG-INV-04, AIG-ASS-09, AIG-OPS-03, AIG-ASS-11, AIG-OPS-01	ISO 8.1, 9.1; A.6.2.6-A.6.2.8, A.9.2	Playbook lifecycle; AIG-OPS-01 rollout roles	Complete
ROL-09	Product / Technical Delivery Lead	Technical delivery	Ensure technical design, testing, release and change evidence meets approved requirements.	Document system design; perform verification/validation; manage environments and release; implement monitoring, security and rollback controls; disclose limitations and dependencies.	Technical recommendation and release execution within approved change and deployment authority; no governance risk acceptance.	Escalates failed tests, limitations, security issues, drift and material change to System/Service Owner and governance functions.			Proposed		Level 4 — AI Specialist	TRN-01, TRN-02, TRN-05, TRN-07, TRN-11		AIG-ASS-02, AIG-ASS-09, AIG-ASS-11, AIG-OPS-01	ISO 8.1; A.6.2.2-A.6.2.8, A.7.2-A.7.6	AIG-OPS-01 technical/delivery role; Model Card	Complete
ROL-10	Data Owner / Data Governance	Specialist control	Authorise and assure appropriate data use, quality and stewardship.	Confirm data ownership, provenance, lawful/approved access, quality, representativeness, lineage, retention and monitoring; resolve data-control exceptions.	Retains data-governance authority under Council policy; can withhold data approval where requirements are unmet.	Escalates material data risks to Service Owner, DPO/IG, SIRO and governance bodies as appropriate.			Proposed		Level 4 — AI Specialist	TRN-01, TRN-05, TRN-06, TRN-11		AIG-ASS-02, AIG-ASS-04, AIG-ASS-05, AIG-ASS-09	ISO 5.3, 8.1; A.4.3, A.7.2-A.7.6	Playbook data roles and lifecycle controls	Complete
ROL-11	DPO / Information Governance	Specialist control	Provide independent data-protection and information-governance advice and assurance.	Determine DPIA needs; advise on lawful basis, transparency, rights, minimisation, retention, sharing and high-risk processing; maintain statutory escalation where applicable.	Retains statutory/professional authority; governance bodies cannot waive legal data-protection requirements.	Escalates unresolved high privacy risk through statutory and Council routes; consults Legal, SIRO, Security and affected services.			Proposed		Level 4 — AI Specialist	TRN-01, TRN-05, TRN-06, TRN-10		AIG-ASS-04, AIG-ASS-05, AIG-ASS-08, AIG-OPS-03, AIG-GOV-06	ISO 5.3, 7.4; A.5.2-A.5.5, A.7	Playbook DPO role; AIG-GOV-06 retained authority	Complete
ROL-12	SIRO / Information Risk	Strategic specialist control	Oversee material information risk and assurance.	Advise on information risk appetite, ownership, escalation and assurance; sponsor resolution of systemic or critical information risks.	Retains information-risk authority under Council governance and approved risk delegations.	Escalates material information risks to Executive Leadership and appropriate governance bodies.			Proposed		Level 5 — AI Governance Leader	TRN-01, TRN-07, TRN-09, TRN-10		AIG-ASS-11, AIG-GOV-06, AIG-AIMS-01, AIG-AIMS-03	ISO 5.1, 5.3, 6.1; A.3.2	Playbook SIRO role; AIG-GOV-06 membership	Complete
ROL-13	Cyber Security	Specialist control	Assess and control AI security, misuse, resilience and supplier-security risks.	Perform threat/risk review; define access, logging, testing and vulnerability requirements; review incidents and supplier evidence; set security closure criteria.	Retains security authority under Council policy; can require remediation or escalation before release.	Escalates critical vulnerabilities, misuse and incidents through Council security and governance routes.			Proposed		Level 4 — AI Specialist	TRN-01, TRN-07, TRN-10, TRN-11		AIG-ASS-08, AIG-OPS-03, AIG-ASS-11, AIG-OPS-01	ISO 8.1; A.4.4-A.4.5, A.6.2.4-A.6.2.8	Playbook Security role; AIG-ASS-11	Complete
ROL-14	Legal Services / Monitoring Officer	Specialist control	Advise on applicable law, powers, contracts, delegations and legal risk.	Maintain legal input to requirements, decisions, transparency, equality/human rights, procurement and incidents; confirm lawful authority and governance route.	Retains professional/statutory authority; legal requirements and Council delegations cannot be displaced by AIMS governance.	Escalates unresolved legality, authority or public-law concerns to the correct statutory and leadership route.			Proposed		Level 4 — AI Specialist	TRN-01, TRN-05, TRN-08, TRN-09, TRN-10		AIG-ASS-04 to AIG-ASS-08, AIG-DEC-03, AIG-GOV-08, AIG-AIMS-01	ISO 4.2, 5.3, 7.4; A.2.3, A.5	Playbook Legal role; AIG-GOV-06 retained authority	Complete
ROL-15	Procurement / Commercial / Contract Owner	Specialist control	Control AI procurement and ongoing supplier obligations.	Trigger governance early; perform due diligence; embed mandatory clauses; manage evidence rights, change, performance, incidents, renewal and exit.	Retains procurement/commercial authority; cannot accept material AI risk outside approved delegations.	Escalates supplier gaps, exceptions, unnotified change and exit/resilience risks to Service Owner, Legal, Security and governance bodies.			Proposed		Level 3 — AI Owner / Manager	TRN-01, TRN-05, TRN-08, TRN-10		AIG-INV-03, AIG-ASS-08, AIG-ASS-11, AIG-OPS-01	ISO 8.1; A.10.2-A.10.4	Playbook Procurement role; Supplier Questionnaire	Complete
ROL-16	Equality / Human Rights / Safeguarding Leads	Specialist control	Assure impacts on protected, vulnerable and affected people.	Determine assessment/engagement needs; challenge impact analysis and mitigations; advise on accessibility, safeguarding and monitoring; review adverse outcomes.	Retains specialist authority under relevant Council policies and statutory duties.	Escalates material or unresolved harm to Service Owner, Legal, governance bodies and safeguarding routes.			Proposed		Level 4 — AI Specialist	TRN-01, TRN-05, TRN-10		AIG-ASS-04, AIG-ASS-06, AIG-ASS-07, AIG-OPS-05, AIG-OPS-03	ISO 4.2, 6.1; A.5.2-A.5.5, A.8.2-A.8.5	Responsible AI, Equality and Human Rights templates	Complete
ROL-17	Communications / Engagement / Complaints	Operational and specialist interface	Provide accessible communication, participation, feedback and redress routes.	Plan internal/external communications; support affected-group engagement; ensure accessible service information; route complaints and track themes and responses.	Communication approval remains with authorised service/corporate owners; complaints retain existing Council authority and independence.	Escalates material complaint trends, misinformation, public-interest issues and accessibility failures.			Proposed		Level 3 — AI Owner / Manager	TRN-01, TRN-02, TRN-05, TRN-10		AIG-ASS-07, AIG-ASS-10, AIG-OPS-05, AIG-OPS-03, AIG-OPS-01	ISO 7.3-7.4; A.3.3, A.8.2-A.8.5	AIG-OPS-01 communications role; Playbook awareness	Complete
ROL-18	Internal Audit / Independent Assurance	Independent assurance	Provide independent, risk-based assurance over AIMS design and operation.	Approve audit scope/programme; assess control design, implementation and effectiveness; report findings independently; follow up agreed actions.	Independent assurance authority under the Council audit framework; does not own or operate audited controls.	Reports findings to appropriate audit and governance bodies; escalates overdue or unacceptable management responses.			Proposed		Level 4 — AI Specialist	TRN-01, TRN-09, TRN-12		AIG-OPS-05, AIG-OPS-06, AIG-GOV-06, AIG-AIMS-01 to AIG-AIMS-04	ISO 9.2; A.3.2	Playbook Internal Audit role; AIG-AIMS-03 IMP-14	Complete
ROL-19	All employees / AI users	Council-wide	Use AI only within approved policy, training and system instructions.	Complete required learning; register or disclose AI use; protect information; follow human-oversight and acceptable-use rules; report concerns, errors and incidents promptly.	No authority to introduce or materially change Council AI unless assigned through an approved role and process.	Raise concerns through line management, Service Owner, AI governance, security, data-protection, whistleblowing or complaints routes as applicable.			Proposed		Level 1 — AI Awareness	TRN-01, TRN-02 for AI users		AIG-GOV-02, AIG-INV-01, AIG-INV-03, AIG-OPS-03	ISO 7.2-7.3; A.3.3, A.4.6, A.9.2	Playbook All Employees role and competency policy	Complete
ROL-20	Data Steward	Service accountability	Look after the quality, meaning and day-to-day use of the data an AI system relies on, on behalf of the Data Owner.	Maintain data definitions and quality checks; keep data lineage and provenance records current; check that data used by AI matches the approved purpose; keep the Information Asset Register entry	No authority to approve AI use or new uses of data; recommends to the Data Owner and Service Owner.	Escalate to the Data Owner, Service Owner, DPO or Information Governance as applicable.			Proposed		Level 3 — AI Owner / Manager	TRN-01, TRN-03, TRN-04, TRN-05, TRN-10		AIG-GOV-02 §5.6 and Appendix A.2; AIG-INV-04 column AA; AIG-ASS-05; AIG-ASS-09	ISO 5.3, 7.2; A.7.4, A.7.5	Proposed v3.9.10 data governance role (Proposed — for Council confirmation)	Complete

The Council — AIMS Competence Matrix and Assessment Record

AIG-AIMS-04 · v1.3 draft · Draft for Council review · OFFICIAL · ISO/IEC 42001:2023

Purpose: define required role-group competence across the Playbook domains and control assessment, gaps, remedial action and evidence.

Current position: proficiency numbers are required levels, not current scores. Every group is marked Not assessed until named people are assessed using approved methods and evidence; training attendance alone is insufficient.

Group ID	Role group	Playbook competency level	AI literacy	Governance / accountability	Risk	Responsible AI	Data / IG	Security / resilience	Operational application	Leadership / oversight	Evidence / assessment method	Assessment frequency	Current assessment status	Current result	Gap / remedial action	Owner	Due date	Evidence location	Related objectives / risks / learning	Record QA
CMP-01	All employees	Level 1 — AI Awareness	1	1	1	1	1	1	1	1	Completion plus short knowledge check	At induction; refresh at least annually	Not assessed		Assess the target population and completion baseline once the programme is approved.	HR / L&D with AI Governance Lead			OBJ-08; R-05; IMP-09; TRN-01	Complete
CMP-02	Regular AI users / practitioners	Level 2 — AI User / Practitioner	2	2	2	2	2	2	3	1	Scenario-based knowledge check and supervisor observation	Before approved use; annual refresh and on material change	Not assessed		Identify the user population and validate practice against approved instructions.	Service Owner / Line Manager			OBJ-04, OBJ-05; R-05; TRN-01, TRN-02	Complete
CMP-03	Managers of AI-using staff	Level 3 — AI Owner / Manager	2	3	3	3	2	2	3	3	Manager module, scenario exercise and management review	On appointment; annual refresh	Not assessed		Confirm which managers supervise AI use and assess governance decision capability.	Directorate Leadership / HR-L&D			OBJ-08; R-04, R-05; TRN-03	Complete
CMP-04	Service Owners	Level 3 — AI Owner / Manager	3	4	4	4	3	3	4	4	Case-based assessment using a real governance submission	Before approval authority; annual and after control failure	Not assessed		Assess named Service Owners after appointment; remediate any lifecycle or accountability gap.	AI Governance Lead / Directorate Leadership			OBJ-02 to OBJ-08; R-04, R-05; IMP-05, IMP-09	Complete
CMP-05	AI System Owners / Operational Leads	Level 3 — AI Owner / Manager	3	3	4	3	3	4	4	3	Operational simulation, threshold/rollback exercise and record review	Before go-live; at least annually and on material change	Not assessed		Validate monitoring, escalation, incident and change-control competence for each live system.	Service Owner / AI Governance Lead			OBJ-04, OBJ-07; R-05, R-11, R-12; TRN-04, TRN-10, TRN-11	Complete
CMP-06	Product / Technical / Data Science specialists	Level 4 — AI Specialist	4	3	4	4	3	4	4	2	Technical portfolio, test evidence, peer review and scenario exercise	Before technical authority; annual CPD review	Not assessed		Map required disciplines to each system and confirm specialist depth, peer review and succession.	Technical Leadership / Service Owner			OBJ-04, R-05, R-07, R-10, R-11; TRN-07, TRN-11	Complete
CMP-07	Data, privacy and information-governance specialists	Level 4 — AI Specialist	3	4	4	4	4	3	3	3	Professional evidence, case review and challenge exercise	On assignment; annual CPD review	Not assessed		Validate AI-specific application of professional expertise and access to external advice.	Relevant Function Head			OBJ-03, OBJ-04; R-05, R-07; TRN-05, TRN-06	Complete
CMP-08	Cyber Security specialists	Level 4 — AI Specialist	3	3	4	3	3	4	3	3	Threat-model review, technical exercise and professional evidence	On assignment; annual CPD review and threat change	Not assessed		Validate AI-specific threat, misuse, resilience and supplier-security competence.	Head of Cyber Security			OBJ-04, OBJ-07; R-05, R-10, R-12; TRN-07, TRN-10, TRN-11	Complete
CMP-09	Legal, equality, human-rights and safeguarding specialists	Level 4 — AI Specialist	3	4	4	4	3	2	3	3	Professional evidence and cross-functional case challenge	On assignment; annual CPD review and legal change	Not assessed		Validate AI-specific public-law, equality, rights and safeguarding capability.	Relevant Function Head			OBJ-03, OBJ-05; R-05, R-06, R-08, R-13; TRN-05	Complete
CMP-10	Procurement, commercial and contract owners	Level 3 — AI Owner / Manager	3	3	4	3	3	3	4	3	Supplier case assessment and contract-control review	Before material AI procurement; annual refresh	Not assessed		Validate early governance triggering, due diligence, clauses, evidence rights and exit competence.	Head of Procurement / AI Governance Lead			OBJ-06; R-05, R-09, R-15; TRN-08	Complete
CMP-11	Governance Secretariat and Working Group members	Level 4 — AI Specialist	3	4	4	4	3	3	4	3	Induction, calibrated case exercise and decision-record sample	Before participation; annual calibration	Not assessed		Assess consistent triage, evidence challenge, conflicts, decisions and escalation.	AI Governance Lead / Working Group Chair			OBJ-02, OBJ-08; R-03 to R-05; TRN-04, TRN-09	Complete
CMP-12	AI Assurance Board and Executive Sponsor	Level 5 — AI Governance Leader	3	4	4	4	3	3	3	4	Board induction, strategic scenario and management-review evaluation	Before decision authority; annual update	Not assessed		Confirm leadership understanding of accountability, risk acceptance, resources and management review.	AI Governance Lead			OBJ-08; R-01, R-04, R-05, TRN-09, TRN-10	Complete
CMP-13	AI Governance Lead and Internal Audit	Level 5 / Level 4 specialist	4	4	4	4	4	4	4	4	Advanced AIMS assessment, audit/implementation evidence and independent review	On appointment; annual CPD and external-change review	Not assessed		Confirm sufficient ISO/IEC 42001, audit, regulatory and practical governance capability; obtain expert support for gaps.	Executive Sponsor / Head of Internal Audit			OBJ-08; R-05, R-14; IMP-05, IMP-09, IMP-14; TRN-12	Complete

The Council — AIMS Learning and Awareness Plan

AIG-AIMS-04 · v1.3 draft · Draft for Council review · OFFICIAL · ISO/IEC 42001:2023

Purpose: define role-based learning, timing, outcomes, delivery, completion, assessment and effectiveness evidence required to support competent AIMS operation.

Current position: modules and targets are proposed designs. No delivery, completion or effectiveness is claimed; approve audience, content, accessibility, dates, pass criteria, ownership and evidence before launch.

Module ID	Module	Audience	Competency level	Requirement	Trigger / deadline	Learning outcomes	Delivery method	Owner	Status	Planned date	Recurrence	Assessment / effectiveness	Completion target	Completion rate	Evidence location	Review date	Related objectives / risks / actions	ISO / SoA links	Decision / design note	Record QA
TRN-01	AI Awareness	All employees, agency workers and relevant contractors	Level 1	Mandatory	At induction and before Council AI use	Recognise AI; understand Council principles, registration, acceptable use, data handling, human accountability and concern routes.	Accessible e-learning with short knowledge check	HR / L&D with AI Governance Lead	Draft design		At least annually	Completion, pass score, feedback and incident trend	100%	0%			OBJ-08; R-05; IMP-09	ISO 7.2-7.3, A.3.3, A.4.6	Confirm target population, pass score, accessibility and LMS reporting.	Complete
TRN-02	Approved AI Use, Acceptable Use and Data Handling	Regular AI users and practitioners	Level 2	Mandatory for AI users	Before access to an approved AI system	Apply approved instructions; protect information; verify outputs; maintain human responsibility; report errors, incidents and misuse; understand use.	System-linked e-learning plus local briefing	Service Owner / Information Governance	Draft design		Annual and on instruction change	Knowledge check, observed practice, user error and incident data	100%	0%			OBJ-04, OBJ-05; R-05, R-10; CMP-02	ISO 7.2-7.3, 8.1; A.4.6, A.9.2	Link access provisioning to completion where technically and lawfully appropriate.	Complete
TRN-03	AI Governance for Managers	Managers of staff who use, commission or oversee AI	Level 3	Mandatory for in-scope managers	On appointment or before supervisory responsibility	Recognise governance triggers; assign owners; prevent shadow AI; support oversight, challenge, escalation and staff capability.	Workshop or facilitated e-learning with scenarios	AI Governance Lead / HR-L&D	Draft design		At least annually	Scenario score, manager confidence, registration and escalation trends	100%	0%			OBJ-01, OBJ-08; R-02, R-05; CMP-03	ISO 5.3, 7.2-7.3, A.4.6, A.9.2	Confirm manager population and appointment timeframe.	Complete
TRN-04	Service and System Owner Lifecycle Governance	Service Owners, System Owners, operational leads and secretariat	Level 3	Mandatory for assigned owners	Before ownership or approval authority	Operate intake, AGPI, assessments, decision records, conditions, monitoring, material change, evidence, incidents and retirement.	Facilitated case-based workshop using suite artefacts	AI Governance Lead	Draft design		Annual calibration and on process change	Completed case, evidence-quality review and governance rework rate	100%	0%			OBJ-01, OBJ-02, OBJ-04; R-03 to R-05; IMP-05, IMP-09	ISO 5.3, 7.2, 8.1; A.3.2, A.6.2, A.9.2	Use representative Council cases and record assessor conclusions.	Complete
TRN-05	Responsible AI and Impact Assessment	Owners, governance members, legal/equality/rights/safeguarding and engagement roles	Levels 3-4	Mandatory where role applies	Before assessing or approving potentially material impacts	Identify people and societal impacts; apply Responsible AI, DPIA, equality and human-rights assessments; plan participation, mitigation and monitoring.	Cross-functional workshop and case challenge	AI Governance Lead with specialist functions	Draft design		Annual and on material legal/process change	Assessment sample quality, challenge outcomes, action closure and complaints	100%	0%			OBJ-03, OBJ-05, R-06, R-08, R-13; CMP-04, CMP-07, CMP-09	ISO 4.2, 6.1, 8.1; A.5.2-A.5.5, A.8.2-A.8.5	Specialist functions define required depth and sign-off.	Complete
TRN-06	Data Protection, Information Governance and Data Quality	Owners, practitioners, data and IG roles	Levels 2-4	Mandatory / role-based	Before relevant data processing or approval	Apply lawful/approved data use, minimisation, transparency, rights, provenance, quality, representativeness, retention and sharing controls.	Role-based modules plus case clinics	DPO / Information Governance / Data Governance	Draft design		Annual and on material change	Assessment quality, data exceptions, DPIA outcomes and audit findings	100%	0%			OBJ-03, OBJ-04; R-07, R-13; CMP-02, CMP-07	ISO 7.2, 8.1; A.4.3, A.5, A.7	Integrate with existing mandatory information-governance learning.	Complete
TRN-07	AI Security, Misuse and Resilience	Technical, security, owner and incident roles	Levels 3-4	Mandatory for relevant roles	Before design approval, security review or operational ownership	Address AI-specific threats, access, logging, misuse, vulnerabilities, supplier controls, resilience, monitoring and secure rollback.	Technical workshop, threat modelling and tabletop exercise	Cyber Security	Draft design		Annual and on threat/material system change	Threat-model quality, exercise outcomes, findings and incident trends	100%	0%			OBJ-04, OBJ-07; R-10, R-12; CMP-05, CMP-08, CMP-09	ISO 7.2, 8.1; A.4.4-A.4.5, A.6.2.4-A.6.2.8	Align to corporate security training and incident processes.	Complete
TRN-08	AI Procurement, Supplier Assurance and Contract Controls	Procurement, commercial, Legal, Service Owners and contract managers	Levels 3-4	Mandatory for material AI sourcing	Before market engagement, contract, renewal or material change	Trigger governance early; conduct due diligence; specify evidence, change, incident, performance, audit, continuity and exit rights.	Procurement clinic and supplier-case assessment	Procurement / Legal / AI Governance Lead	Draft design		Annual and on template/legal change	Supplier case quality, clause exceptions, findings, change notices and exit readiness	100%	0%			OBJ-06; R-09, R-10, R-15; CMP-10	ISO 7.2, 8.1; A.10.2-A.10.4	Embed triggers into procurement guidance and assurance gates.	Complete
TRN-09	Governance Decision-Maker Induction and Calibration	Executive Sponsor, Board, Working Group, chairs and secretariat	Levels 4-5	Mandatory before governance participation	Before first meeting or decision	Understand mandate, delegations, conflicts, evidence expectations, risk tiering, specialist authority, decision recording, escalation and management review.	Induction pack, facilitated case calibration and annual update	AI Governance Lead	Draft design		Annual and on Terms of Reference/delegation change	Attendance, calibration consistency, decision-record quality and rework	100%	0%			OBJ-02, OBJ-08; R-01, R-03 to R-05; IMP-05	ISO 5.1, 5.3, 7.2-7.4, 9.2, A.3.2	Do not grant decision authority solely through training; formal appointment is also required.	Complete
TRN-10	AI Incident, Concern, Complaint and Tabletop Response	Owners, governance, security, DPO, Legal, communications and complaints roles	Levels 2-5	Mandatory where role applies	Before go-live or incident-response duty	Triage and contain; notify; preserve evidence; communicate; investigate root cause; manage complaints/redress; verify corrective-action effectiveness.	Cross-functional tabletop using AIG-OPS-03	Incident Lead / AI Governance Lead	Draft design		At least annually and after material incident	Exercise results, response time, missed hand-offs, action closure and recurrence	100%	0%			OBJ-05, OBJ-07; R-08, R-12; IMP-13	ISO 7.2-7.4, 10.2, A.3.3, A.8.3-A.8.4	Align severity and notification with Council incident frameworks.	Complete
TRN-11	Technical Verification, Validation, Monitoring and Change	Technical leads, data scientists, System Owners and reviewers	Level 4	Mandatory for technical authority	Before testing, release, monitoring or material-change decisions	Define acceptance criteria; test limitations and affected groups; monitor drift/performance; maintain traceability; trigger change control and rollback.	Technical lab, peer review and evidence assessment	Technical Leadership / AI Governance Lead	Draft design		Annual CPD and on material technology change	Test/evidence sample quality, threshold breaches, change and incident trends	100%	0%			OBJ-04; R-07, R-10, R-11; CMP-05, CMP-06	ISO 7.2, 8.1, 9.1, A.6.2.5-A.6.2.8, A.7	Tailor depth to system risk and technical role.	Complete
TRN-12	Advanced AIMS Implementation and Independent Assurance	AI Governance Lead, nominated deputies and Internal Audit	Levels 4-5	Mandatory for AIMS/audit leads	Before leading implementation or independent audit	Apply ISO/IEC 42001 requirements; maintain scope, SoA, objectives, risks and evidence; plan audits and management review; manage nonconformity and improvement.	Advanced practitioner course, supervised application and independent review	Executive Sponsor / Head of Internal Audit	Draft design		Annual CPD and standards change	Practical work product, audit quality, finding consistency and improvement outcomes	100%	0%			OBJ-08; R-05, R-14; IMP-02, IMP-14, IMP-15	ISO clauses 4-10; Annex A	Confirm independence and avoid self-audit of controls operated by the same individual.	Complete

The Council — AIMS Communications Plan

AIG-AIMS-04 · v1.3 draft · Draft for Council review · OFFICIAL · ISO/IEC 42001:2023

Purpose: control AIMS messages, audiences, ownership, channels, triggers, accessibility, evidence and effectiveness for internal and external interested parties.

Current position: all activities are draft designs. Approve the message, sender, audience, timing, accessibility, confidentiality and evidence before issue; retain actual publication and effectiveness records.

Communication ID	Objective / core message	Audience / interested party	Owner	Sender / approver	Channel	Timing / trigger	Frequency	Accessibility / consultation	Required record / evidence	Status	Target date	Last issued	Effectiveness measure	Related objectives / risks / actions	ISO / SoA links	Decision / design note	Record QA
COM-01	Formal leadership adoption: explain scope, mandate, accountable ownership, delegations, resources and effective date.	Executive Leadership, governance bodies, control-function heads and directorate leadership	Executive Sponsor	Adopting authority / corporate communications	Formal decision, leadership briefing and controlled publication	On approval of the AIMS and any material governance change	Once, then on material change	Accessible summary; opportunity for questions and recorded specialist consultation	Approval record, published message, audience list, questions/actions	Draft design			Receipt, leadership understanding, unresolved questions and assigned actions	OBJ-08; R-01, R-04; IMP-01, IMP-03, IMP-05	ISO 5.1-5.3, 7.3-7.4, A.2.2, A.3.2	Must not describe draft documents as approved or operational.	Complete
COM-02	All-staff awareness: approved AI use, registration, acceptable-use rules, human responsibility and routes for concerns.	All employees, agency workers and relevant contractors	AI Governance Lead / HR-L&D	Executive Sponsor / Internal Communications	Intranet, staff bulletin, learning campaign and manager cascade	At launch; induction; major policy or risk change	Annual campaign plus triggered updates	Accessible formats, plain language and feedback route	Published content, audience/reach data, learning link and FAQs	Draft design			Reach, learning completion, knowledge score, registrations and reported shadow AI	OBJ-01, OBJ-08; R-02, R-05; IMP-08, IMP-09	ISO 7.3-7.4, A.3.3, A.4.6, A.9.2	Align with AIG-INV-01 staff guide and approved policy.	Complete
COM-03	Manager and owner briefing: governance triggers, accountability, approval tiers, evidence and escalation.	Managers, Service Owners, System Owners and delivery leads	AI Governance Lead	AI Governance Lead / Directorate Leadership	Briefing session, manager toolkit and office hours	Before ownership or supervisory duty; at launch	At least annually and on process change	Scenario-led, role-specific and available in accessible formats	Attendance, toolkit version, questions, actions and competence assessment	Draft design			Attendance, scenario results, registration timeliness and governance rework	OBJ-02, OBJ-08; R-03 to R-05, IMP-05, IMP-09	ISO 5.3, 7.2-7.4, A.3.2, A.4.6	Coordinate with TRN-03 and TRN-04.	Complete
COM-04	AI Register and intake guidance: when and how to register, expected response, status meanings and support route.	Council staff, project teams, procurement, suppliers working through Council teams	AI Governance Lead	AI Governance Working Group Chair	Intranet guidance, intake form, drop-in clinics and project templates	At launch; new project/procurement; form/process change	Continuous availability; quarterly reminder during implementation	Accessible form and guidance; assisted route for users who need it	Published version, usage data, enquiries, response times and form changes	Draft design			Registration volume/completeness, abandoned requests, response time and user feedback	OBJ-01, OBJ-02; R-02, R-03; IMP-06, IMP-07	ISO 7.4, 8.1, A.4.2, A.8.5, A.9.2	Use one AI Register ID across all evidence.	Complete
COM-05	Governance body induction and decision protocol: mandate, evidence, conflicts, specialist authority and decision records.	Executive Sponsor, Board, Working Group, secretariat and regular advisers	AI Governance Lead	AI Governance Lead / relevant Chair	Induction pack, calibrated case workshop and meeting standing items	Before participation and on appointment/delegation change	Annual calibration plus triggered update	Materials issued early; conflicts and accessibility needs captured	Attendance, declarations, calibration result, minutes and updated pack	Draft design			Decision consistency; evidence quality; conflicts handled and rework	OBJ-02, OBJ-08; R-01, R-03, R-04; IMP-05	ISO 5.3, 7.2-7.4, A.3.2	Training does not itself confer decision authority.	Complete
COM-06	Specialist-control integration: confirm retained authority, hand-offs, service levels, evidence and escalation.	DPO/IG, SIRO, Security, Legal, Procurement, Data, Equality, Human Rights, Safeguarding, Audit	AI Governance Lead	Executive Sponsor / relevant Function Heads	Cross-functional workshop, operating agreement and process maps	Before AIMS activation and on material organisational change	At least annually	Allow specialist functions to document constraints and resourcing needs	Agreed interfaces, action log, service expectations and escalation records	Draft design			Hand-off failures, overdue reviews, disputed authority and resource actions	OBJ-02, OBJ-08; R-04, R-05; IMP-05	ISO 5.3, 7.1, 7.4, A.3.2	AIG-GOV-06 states specialist functions retain their authority.	Complete
COM-07	Supplier and market communication: disclose Council AI governance, due-diligence evidence, contract, change, incident and exit expectations.	Bidders, suppliers, partners, contract owners and procurement teams	Procurement / Contract Owner	Legal / authorised procurement approver	Procurement documents, contracts, supplier briefings and review meetings	Before market engagement; contract/renewal; material supplier change	Per procurement and scheduled supplier review	Proportionate to market and procurement law; accessible supplier route for clarification	Issued requirements, questions, due diligence, clauses, exceptions and review minutes	Draft design			Compliance, exceptions, evidence timeliness, unmodified change and exit readiness	OBJ-06; R-09, R-10, R-15; IMP-10	ISO 7.4, 8.1, A.10.2-A.10.4	Do not disclose sensitive security detail outside approved channels.	Complete
COM-08	Live-system operational communication: approved purpose, limits, instructions, oversight, thresholds, escalation and rollback.	Authorised users, supervisors, support teams and operational owners	AI System Owner / Service Owner	Service Owner and relevant control owners	Operating procedure, user briefing, in-product guidance and release notice	Before go-live/access; material change; threshold or incident response	At every release/change plus periodic refresh	Role-specific, accessible and tested with representative users	Approved instructions, attendance/acknowledgement, release record and user feedback	Draft design			Instruction comprehension, user error, overrides, incidents and support demand	OBJ-04, OBJ-05, OBJ-07; R-08, R-10, R-11	ISO 7.3-7.4, 8.1, A.6.2.6-A.6.2.8, A.9.2	Link to AIG-ASS-09 Model Card and AIG-OPS-01 rollout evidence.	Complete
COM-09	Resident/service-user transparency: explain relevant AI use, purpose, human role, significant limits, data/rights, accessibility, contact and redress.	Residents, service users, communities and affected groups	Service Owner / Communications	Authorised service owner with DPO/Legal/specialist review	Service pages, notices, letters, assisted channels and engagement sessions	Before applicable use; material purpose/impact change; emerging concern	Continuous availability and periodic review	Plain language, accessible formats, language/assisted routes and proportionate affected-group testing	Approved content, accessibility/user testing, consultation, publication and change records	Draft design			Understanding, accessibility findings, contact/complaint themes and resulting service changes	OBJ-03, OBJ-05; R-06, R-08, R-13	ISO 4.2, 7.4; A.5.4, A.8.2-A.8.5	Apply proportionality; legal/privacy notices remain subject to specialist approval.	Complete
COM-10	Urgent incident and risk communication: what happened, containment, affected parties, actions, contact and update cadence.	Incident team, leadership, regulators/partners where required, staff, residents and media as applicable	Incident Lead	Authorised incident/corporate communications owner with specialist clearance	Secure incident channels, notifications, service updates and holding statements	Severity-based trigger under approved incident plan	As required until closure	Protect confidentiality; use accessible/public channels where affected people need timely information	Incident log, approvals, notifications, message versions, receipt and follow-up	Draft design			Notification timeliness, accuracy, reach, misinformation, complaints and lessons learned	OBJ-05, OBJ-07; R-08, R-12; IMP-13	ISO 7.4, 10.2, A.3.3, A.8.3-A.8.4	Align severity, notification and legal duties with corporate processes.	Complete
COM-11	AIMS performance and assurance reporting: objectives, risk, inventory, control effectiveness, incidents, learning, audit and actions.	Working Group, Board, Executive Sponsor, leadership and assurance committees	AI Governance Lead	Relevant Chair / Executive Sponsor	Dashboard, governance report, management-review pack and audit updates	Approved reporting calendar; material exception; management review	Monthly during implementation; at least quarterly thereafter	Clear definitions, data-quality notes, exceptions and decision requests	Controlled report, source data, minutes, decisions and action log	Draft design			Data completeness/accuracy, decisions made, overdue actions and trend response	OBJ-01 to OBJ-08; R-14; IMP-12, IMP-14, IMP-15	ISO 9.1-9.3, 10.1; A.8.5	Do not imply control effectiveness without operating evidence.	Complete
COM-12	Learning, lessons and community of practice: share safe patterns, recurring issues, controls and improvement opportunities.	Owners, practitioners, specialists, governance members and interested staff	AI Governance Lead	AI Governance Lead / relevant specialist owner	Community sessions, clinics, anonymised case notes and learning bulletins	After pilots, incidents, complaints, audits and material reviews	Quarterly during implementation	Anonymise sensitive cases; ensure inclusive participation and accessible materials	Session records, anonymised learning, actions, feedback and control changes	Draft design			Participation, repeat issues, adopted improvements and competence feedback	OBJ-07, OBJ-08; R-05, R-12, R-14; IMP-07, IMP-13	ISO 7.3-7.4, 10.1-10.2, A.4.6	Share only approved and appropriately de-identified material.	Complete
COM-13	Applicable-requirement and material-change updates: explain what changed, affected roles/systems, actions and effective date.	Leadership, governance, Service/System Owners and relevant control functions/suppliers	Legal Services / AI Governance Lead	Applicable requirement owner / authorised governance body	Targeted alert, change note, updated controlled documents and briefing	New/changed law, regulation, policy, standard, contract or risk context	Event-driven; periodic horizon review	Target only affected groups while maintaining an accessible authoritative record	Source assessment, applicability decision, affected records, communications and action closure	Draft design			Timeliness, affected-system coverage, action closure and outdated-document findings	OBJ-03, OBJ-08; R-13; IMP-04	ISO 4.2, 6.1, 7.4, 9.1; A.2.3	Coordinate with the AIMS applicable-requirements and change register (AIG-AIMS-05).	Complete

AIG-AIMS-04 — Definitions, Evidence Rules and Controlled-Use Guidance

Role status	Meaning
Proposed	Role design only; no person or body is appointed by this workbook.
Confirmed	Named appointee, authority/appointment evidence, deputy arrangements and review date are retained.
Vacant	Approved role has no current appointee; risk, interim cover and escalation should be recorded.
Interim	Time-limited appointment with explicit authority, deputy/cover and review date.
Suspended	Authority is temporarily suspended through an authorised decision.
Retired	Role is no longer required or is superseded through an approved change.

Assessment status	Meaning
Not assessed	Required profile is defined but current competence has not been assessed.
Assessment planned	Assessor, method, scope and date are agreed.
Assessed - competent	Evidence supports competence for the assigned role and scope, with review date.
Assessed - gap	A defined competence gap needs supervision, restriction, training or other remedial action.
Expired / reassess	Evidence is no longer current because of time, role, technology, control failure or material change.

Learning / communicatior	Meaning
Draft design	Content/activity is proposed; nothing has been approved or issued.
Approved	Authorised design, owner, audience, timing and evidence requirements are confirmed.
Scheduled	Delivery/issue date and resources are confirmed.
Active	Recurring activity is operating and being monitored.
Issued	A communication was issued and evidence retained.
Complete	Planned delivery is finished and effectiveness evidence reviewed.
Paused	Activity is formally paused with reason and review decision.
Retired	Activity is superseded or no longer required through approved change.

Playbook competency levels

Level 1	**AI Awareness**	All employees	Recognise AI, core principles, acceptable use and reporting routes.
Level 2	**AI User / Practitioner**	People using AI in work	Use approved systems safely, verify outputs, protect information and follow instructions.
Level 3	**AI Owner / Manager**	Managers and accountable owners	Own lifecycle governance, risk, human oversight, evidence and operational performance.
Level 4	**AI Specialist**	Technical, legal, data, security and governance specialists	Apply specialist expertise to AI design, review, assurance and challenge.
Level 5	**AI Governance Leader**	Executive and AIMS leaders	Set direction, exercise accountability, allocate resources, accept/escalate risk and review effectiveness.

Domain proficiency scale used in the Competence Matrix

1	**Awareness**	Recognises concepts, duties and escalation routes; needs guidance for application.
2	**Working**	Applies approved instructions in routine scenarios and recognises when to seek specialist advice.
3	**Practitioner**	Applies and explains controls in varied cases, exercises judgement and supports others.
4	**Expert / lead**	Leads, challenges or independently assures complex application and maintains professional currency.

Appointment, competence and evidence rules

• AIG-GOV-06 and approved Council delegations are the authority source. This workbook operationalises them and cannot create or expand authority.

• Record formal appointments, terms, delegation references, conflict declarations, deputies and review dates in approved Council systems.
• Keep personal data proportionate. Use this register for role-level evidence references; detailed staff learning records should remain in the approved LMS/HR repository.
• Required competency levels describe the role, not the person. Assess each named holder against the role and scope actually assigned.
• Competence may be supported by education, training, professional standing, experience, supervised practice, tests, exercises and observed work.
• Training completion is evidence of participation, not conclusive evidence of competence or authority.
• Define restrictions, supervision, remediation and review dates where competence gaps exist; escalate gaps that affect safe control operation.
• Reassess after material role, system, legal, threat or process change, or after incident, complaint, audit finding or control failure.
• Communications require an approved sender, accessible channel, confidentiality check, retained issue evidence and an effectiveness measure.
• Review effectiveness using completion and assessment results, case quality, rework, incidents, complaints, audits, feedback and AIMS performance.

Source, mapping and controlled-use note
Standard baseline: ISO/IEC 42001:2023, Information technology — Artificial intelligence — Management system.
Official standard page: https://www.iso.org/standard/42001
Primary clauses: 5.3 organisational roles, 7.2 competence, 7.3 awareness, 7.4 communication, 7.5 documented information, 9.1 performance evaluation and 10.1 continual improvement.
Relevant Annex A design links include A.3.2 roles, A.3.3 reporting concerns, A.4.6 human resources, A.8.2-A.8.5 interested-party information and A.9.2 responsible use.
Council sources: AI Governance Playbook (AIG-GOV-02, current controlled version per AIG-GOV-03); AIG-GOV-06 Terms of Reference; AIG-OPS-01 AI Deployment and Rollout Plan; AIG-AIMS-03 Objectives, Risk Treatment and Improvement Plan.
AIG-AIMS-03 linkage: IMP-05 requires approved roles, delegations, RACI and competence/resource plan; IMP-09 requires role-based training and verified competence.
Validate ISO clause and control references against the Council’s licensed standard before formal adoption or certification use.
Control status: draft for Council review. Nothing in this workbook appoints a person, delegates authority, proves competence, records completed training or proves communication effectiveness.

AIG-AIMS-04 — PROPOSED AIG-INV-04/AIG-DEC-04 INTEGRATION NOTES

NOT APPROVED — additive integration annex only; existing workbook content and formulas are retained unchanged. AIG-INV-04 (AI Register) and AIG-DEC-04 (Gate Log) are themselves proposed designs: until the Council approves their adoption and migration, the Council's existing records remain authoritative and the AIG-INV-04/AIG-DEC-04 joins below are design references only. No live system, event, evidence, approval or Council decision is asserted.

Review topic	Targeted proposed integration note
Status / authority	The named functions, role profiles, communications and training are proposed role design; no person, committee, appointment, competence, course completion, communication or authority is evidenced by this annex. Confirm positions and delegations against the current Council Constitution/Scheme of Delegation and retain authorised appointment evidence.
Role-to-system join	Use AIR-ID from proposed AIG-INV-04 AI Register to relate the designated Service Owner/System Owner and applicable specialist responsibility to a particular system. The role plan remains the controlled AIMS role/competence source: avoid copying names, contact details, HR data or role definitions into AIG-INV-04/AIG-DEC-04; store only role references needed for a join.
Decision and condition ownership	For each actual gate, AIG-DEC-04 Gate plan may identify the proposed responsible role; Gate events records the actual event/actor and its evidence/decision reference; Conditions holds the action owner/role and due date per condition. Confirm the individual's appointment, authority and competence in the appropriate controlled source. An event's actor or an owner label is not proof of delegation.
Competence evidence	Connect role-based competence/assessment evidence to the related AIR-ID only when system-specific competence is material; otherwise maintain AIMS-level role evidence. Use a minimal Evidence ID/source pointer in AIG-INV-04 Evidence index where approved. Training attendance alone does not establish assessed competence; do not place sensitive personnel details in the register or gate workbook.
Communications evidence	Keep each communication plan's audience, sender/approver, channel, timing, accessibility, consultation and required record in this workbook. When a communication relates to a specific system or gate, reference AIR-ID and, if relevant, Event ID/Condition ID plus Evidence ID; retain issued version and audience evidence in the authorised source. Planned communications are not issued communications.
Escalation / change	Role vacancy, expired competence, changed authority, missed training, inaccessible communication or unavailable specialist capacity should be risk-assessed and escalated via the approved governance route. Record a dated AIG-DEC-04 event only when an actual forum/event occurs; update current register state only through authorised change, with AIG-DEC-03/native decision and supporting evidence.
Open adoption checks	Validate role ownership, deputies, resource/capacity commitments, competence criteria and evidence-retention arrangements with HR/L&D and relevant control functions. Confirm communications approval and record systems; do not claim clause 5.3/7.1–7.4 operation on this designed plan alone.

PROPOSED QA INDEX — NOT APPROVED. A source reference does not establish applicability or compliance. See AIG-AIMS-05 and AIG-AIMS-13; owners must validate the current source, case-specific scope, control evidence and adopted status.

Requirement ID	Instrument / edition	Conditional scope / relevance	Source URL	Owner validation status
REQ-027	Public Interest Disclosure Act 1998 / Employment Rights Act whistleblowing protections	Screen the legislation requirement against this artefact's actual use and record evidence/version; see the AIG-AIMS-05 Applicable Requirements entry (REQ-027) for the controlled position.	https://www.legislation.gov.uk/ukpga/1998/23/contents	Specialist validation required
REQ-040	ISO/IEC 42001:2023 Artificial intelligence management system	Proposed management-system design mapping; licensed clause review and adoption needed.	https://www.iso.org/standard/42001	Specialist validation required

AIG-AIMS-04 / PROPOSED THREE-ARTEFACT SOURCE CONTRACT

Status	PROPOSED INTEGRATION DESIGN ONLY. This sheet does not amend the artefact's native assessment, decision authority, data or formulas.
Role of this file	Competence and roles: Train the Service Owner on AIG-INV-03 facts, AIG-INV-04 handoff, and review of UC/CAP links; technical owners own component facts, specialists own their assessments; only delegated forums decide.
AIG-INV-04 source	Separate AIG-INV-04 AI Register: official AIR-ID, current position, in-file Assessment summary/Evidence index. Reconcile against authoritative AIG-INV-04 before using a copied value.
AIG-DEC-04 source	Separate AIG-DEC-04 Gate Log: prospective Gate plan, dated Gate events, event-linked Conditions. A planned gate is not a decision. A decision requires AIG-DEC-03 or approved minutes and proper delegation.
Map source	Proposed standalone Capabilities and System Map (candidate catalogue ID AIG-INV-05): UC/CAP and component relationship pointers. Edge ID is not an approval or permission; AIG-AGT-04/AIG-AGT-05 remain sources of agent scope/authority.
Data exchange	Use controlled AIR-ID across files. Where applicable reference exact Event ID, Condition ID, Evidence ID, AG-ID and Edge ID. Record source file/version/as-at with imported or quoted evidence; no live cross-workbook formula is assumed.
Change trigger	New or expanded system/tool access, or a material model, data, interface, purpose or agent change: log the map change, obtain owner reassessment and escalate to the proper AIG-DEC-04 gate/AIG-DEC-03 decision when required.
Validation before use	The INTEGRATION INV-04 DEC-04 tab in this workbook is current supporting design guidance (not historical) and holds the detailed join notes. Controlled owners must reconcile real records, validate values and formulas in Excel, and approve migration/cutover; existing Council records remain unchanged until then.
