Immediate implementation decisions
1. Legal, DPO and specialist owners validate all 58 applicability entries.
2. Close the DUAA 2025 gap assessment, including complaints and updated ADM interpretation.
3. Complete EU AI Act territorial/actor screening and apply only where legally in scope.
4. Formally decide ATRS, ISO/IEC 42001 and related voluntary-standard adoption.
5. Populate the authoritative Council policy, Constitution and delegation sources.
6. Approve horizon-scanning ownership, cadence, escalation and evidence.
7. Link every live AI Register record to case-specific legal, contract and partnership obligations.

Controlled requirements and change process
1. Identify an authoritative source or received obligation; record its legal/policy status and date.
2. Specialist owner validates applicability, interpretation, affected services/systems and any conflict.
3. Assign an accountable owner, evidence, review frequency and affected AIMS/process/control references.
4. Assess change significance and urgency; record decision, target, resources and interim risk controls.
5. Update affected policies, artefacts, contracts, systems, training and communications through approved change control.
6. Verify implementation and effectiveness; retain evidence and close or continue monitoring.
7. Feed open changes, overdue reviews, evidence gaps, material changes and trends into risk treatment, audit and AIMS management review.

The Council — Requirements Evidence and Review Matrix

AIG-AIMS-05 · v1.9 draft · Draft for Council review · OFFICIAL · ISO/IEC 42001:2023

Purpose: define the minimum evidence packs, owners, locations, retention basis, sampling and review needed to demonstrate implementation and effectiveness.

Current position: evidence requirements are defined but no repository location or operational evidence is claimed. Populate only approved locations and test retrievability using the AI Register ID.

Evidence ID	Domain	Minimum evidence pack	Proposed owner	Affected requirements	Approved repository / system	Retention basis	Sampling / review	Status	Evidence location / index	Last reviewed	Next review	Gap / required action	Related suite references	Record QA
EVD-01	Data protection	Processing roles, lawful basis, ROPA, DPIA, privacy information, rights/complaints, data agreements and monitoring.	DPO / Information Governance	REQ-001 to REQ-004, REQ-029, REQ-033, REQ-034, REQ-056		Council retention schedule / statutory need	Quarterly sample of priority AI systems and after material change	**Required - not evidenced**				Populate authoritative location and test retrieval by AI Register ID.	AIG-INV-04, AIG-ASS-04, AIG-ASS-05, AIG-OPS-05, AIG-OPS-03	**Evidence location missing**
EVD-02	Equality and human rights	EIA/HRA/Responsible AI assessment, legal advice, engagement, accessibility, mitigations, residual decision and outcome monitoring.	Equality / Human Rights / Legal	REQ-005 to REQ-008, REQ-035		Council retention schedule / legal claims and accountability	Quarterly sample of high-impact systems; after complaint or change	**Required - not evidenced**				Populate locations and validate evidence quality with affected-group input.	AIG-ASS-04, AIG-ASS-06, AIG-ASS-07, AIG-ASS-10, AIG-OPS-05	**Evidence location missing**
EVD-03	Public law and decision authority	Statutory power, delegation, decision policy, human oversight, reasons, review/appeal and decision records.	Monitoring Officer / Legal / Governance	REQ-006, REQ-007, REQ-013, REQ-045		Council governance/records schedule	Every higher-risk decision; annual authority review	**Required - not evidenced**				Link current Constitution/delegations and sample authorised decisions.	AIG-DEC-03, AIG-GOV-06, AIG-AIMS-01, AIG-AIMS-04	**Evidence location missing**
EVD-04	Information access and records	Evidence index, retention, access, retrieval, FOI/EIR decisions, publication and controlled disposal/holds.	Information Governance / Records / FOI	REQ-009 to REQ-012, REQ-020, REQ-046		Approved retention schedule / FOIA Section 46 Code	Quarterly retrieval sample and annual schedule review	**Required - not evidenced**				Approve evidence taxonomy and perform retrieval test across supplier records.	AIG-GOV-01, AIG-INV-04, AIG-ASS-08 to AIG-ASS-10, AIG-DEC-03, AIG-OPS-05,	**Evidence location missing**
EVD-05	Procurement and supplier	Regime decision, business case, notices, conflicts, due diligence, evaluation, contract, obligations, KPI, changes, audit, continuity and exit.	Procurement / Contract Owner / Legal	REQ-015 to REQ-018, REQ-048, REQ-051		Procurement and contract retention rules	Each procurement/renewal/change; quarterly supplier portfolio review	**Required - not evidenced**				Link at least two live supplier cases and test mandatory clause/evidence coverage.	AIG-ASS-08, AIG-ASS-11, AIG-OPS-01	**Evidence location missing**
EVD-06	Data sharing and intellectual property	Lawful power, data-sharing terms, licences, provenance, permitted use, ownership, supplier warranties and publication decisions.	Legal / DPO / Data Owner	REQ-019 to REQ-022, REQ-051		Contract/IP/records schedule	Each new dataset/partner/licence; annual portfolio review	**Required - not evidenced**				Populate dataset and licence evidence for priority systems.	AIG-ASS-02, AIG-ASS-05, AIG-ASS-08, AIG-ASS-09	**Evidence location missing**
EVD-07	Security and resilience	Architecture, threat model, access, tests, vulnerabilities, logs, incident, continuity, recovery, supplier security and exit.	Cyber Security / Resilience / System Owner	REQ-023 to REQ-025, REQ-039, REQ-047, REQ-054		Security/incident/contract retention rules	Before go-live; continuous monitoring; annual exercise	**Required - not evidenced**				Map AIG-ASS-11 to corporate/NCSC controls and test one live system.	AIG-OPS-03, AIG-ASS-11, AIG-OPS-01	**Evidence location missing**
EVD-08	Workforce, competence and concerns	Consultation, occupational risk, role appointments, learning, competence assessment, restrictions, concern/whistleblowing and action records.	HR / H&S / AI Governance Lead	REQ-026, REQ-027, REQ-049		HR/LMS/whistleblowing retention rules	Annual; on appointment, role change, incident or concern	**Required - not evidenced**				Link approved role/training evidence without over-collecting personal data.	AIG-OPS-03, AIG-AIMS-04	**Evidence location missing**
EVD-09	Children and safeguarding	Current service-law map, safeguarding/child impact, voice/engagement, information sharing, human judgement, multi-agency terms, monitoring and incidents.	Children's Services / Safeguarding	REQ-028, REQ-029, REQ-049		Children's services/safeguarding retention rules	Every relevant system; quarterly practice sample	**Required - not evidenced**				Validate evidence on any relevant live/pilot system against 2026 guidance. AIG-AIMS-05 — Definitions, Validation Rules and Controlled-Use Guidance

Applicability status	Meaning
Applicable	Requirement governs the AIMS/Council domain; specific provisions and system triggers still require specialist interpretation.
Conditional	Applies only when the recorded trigger, territory, service, processing, technology or contractual condition is met.
Voluntary adopted	Not generally mandatory for the Council, but proposed as a binding Council commitment through formal adoption.
Proposed adoption	The suite proposes adoption; it is not binding until approved by the competent authority.
Guidance to consider	Authoritative or relevant guidance to assess; not automatically equivalent to a legal duty.
Needs legal validation	Potential requirement whose status cannot be confirmed without competent review.
Not applicable (approved)	Competent owner has documented and approved a justified exclusion, scope condition and review trigger.

Validation status	Meaning
Specialist validation required	Desk-reviewed starting position; no competent owner has approved applicability/interpretation.
Validation scheduled	Named reviewer, scope and target date are agreed.
Validated	Competent owner approved applicability, interpretation, affected controls/systems and review.
Rejected / superseded	Requirement is not applicable or has been replaced, with authority, rationale and review trigger retained.

Change status	Meaning
Assessment required	Source is identified; impact, applicability, priority and action require approval.
Monitoring	No immediate control change approved; named owner and next review retained.
Action approved	Change and resources are authorised with target and owner.
In progress	Implementation is under way and interim risk is controlled.
Implemented	Change is implemented; effectiveness/closure evidence is being verified.
Closed	Implementation and effectiveness evidence are approved.
Not applicable	Competent owner approved no action with rationale and review trigger.

Validation and legal-control rules

- This register supports ISO/IEC 42001 clause 4.2 and related controls; it does not replace the Council's corporate legal/obligations registers or legal advice.
- Legal Services, the DPO, Monitoring Officer and specialist functions retain authority for their domains. AI governance cannot waive statutory or professional requirements.
- Validate applicability at both AIMS level and AI-system level. A law may govern the Council but only particular provisions may be triggered by a specific use.
- Record authoritative source, version/date, interpretation, owner, affected system/process, evidence, review and approved decision. Do not rely on summaries alone.
- Distinguish law, statutory guidance, regulator guidance, government policy, voluntary standards, Council policy and contract. Their authority and change routes differ.
- Treat proposed Bills, consultations and policy statements as horizon items until their legal status changes.
- Use current commencement and transitional provisions. For procurement, record the governing regime for each case.
- For EU AI Act entries, document territorial scope and Council/supplier actor roles before applying or rejecting obligations.
- For DUAA and automated decisions, use current law and DPO/Legal interpretation; several older ICO AI pages are expressly under review.
- A change closes only when affected documents, systems, contracts, training and communications are updated and effectiveness evidence is approved.
- Keep evidence proportionate, secure and retrievable through the AI Register ID; apply retention, legal holds, FOI/EIR and data-protection rules.
- Escalate uncertainty, conflict, overdue high-priority change or lack of competent ownership into AIMS risk treatment and management review.

Verified current-position notes — 2026-08-07

1. DUAA: Royal Assent 19 June 2025. The main data-protection amendments (including s.80, UK GDPR Articles 22A to 22D) commenced on 5 February 2026 under SI 2026/82 reg 2; the s.103 complaints duty (DPA 2018 s.164A) applies from 19 June 2026 (reg 3). The Act amends rather than replaces UK GDPR, DPA 2018 and PECR.

2. ICO: its existing AI/data-protection guidance is under review following DUAA; updated automated-decision guidance and an AI/ADM code are in development.

3. EU Commission: the EU AI Act entered into force in 2024 and became generally applicable/enforceable from 2 August 2026, with staged exceptions.
4. EU Commission: the AI Omnibus entered into force on 27 July 2026; official material reports Annex III high-risk rules from 2 December 2027 and Annex I product rules from 2 August 2028.
5. GOV.UK: Procurement Act 2023 and associated new public-procurement regime commenced on 24 February 2025; the NPPS took effect alongside it.
6. GOV.UK: ATRS is mandatory for central government departments and in-scope arm's-length bodies and is recommended (voluntary) for local authorities, including the Council.
7. GOV.UK: the AI Playbook and AI Insights are public-sector guidance; their use by a local authority requires an adoption/benchmark decision rather than automatic classification as law.
8. ISO sources identify ISO/IEC 42001:2023, ISO/IEC 23894:2023, ISO/IEC 42005:2025 and ISO/IEC 42006:2025; licensed texts are required for formal clause/control validation.

AIG-AIMS-05 — PROPOSED AIG-INV-04/AIG-DEC-04 INTEGRATION NOTES

NOT APPROVED — additive integration annex only; existing workbook content and formulas are retained unchanged. AIG-INV-04 (AI Register) and AIG-DEC-04 (Gate Log) are themselves proposed designs: until the Council approves their adoption and migration, the Council's existing records remain authoritative and the AIG-INV-04/AIG-DEC-04 joins below are design references only. No live system, event, evidence, approval or Council decision is asserted.

Review topic	Targeted proposed integration note
Status / classification	Maintain the workbook's distinction between legislation, regulation, statutory guidance, regulator guidance, government policy, voluntary standards, Council policy and case-specific contract. Applicability and validation fields are proposed until confirmed by the competent legal/specialist owner; no generic source URL by itself establishes an implemented control or legal interpretation.
AIMS-level and case-level scope	The requirements/change register is the authoritative AIMS source for applicability, source/version/date, validation, change and review. Where an obligation depends on a service, territory, actor, processing, supplier or contract, use AIR-ID to point to the affected proposed AIG-INV-04 system and record the competent case-specific assessment in its source evidence; do not assert a universal system obligation from a generic requirement entry.
AIG-INV-04 evidence join	For each affected AIR-ID use AIG-INV-04 Evidence index metadata to point to the versioned source, date, status and authorised location of the actual interpretation, obligation schedule, assessment or proof. Do not copy legal advice, contract content, personal data or an unverified citation into the map; missing approved location and evidence remain gaps.
Change-to-event flow	Keep requirement source changes and decisions in the Requirements Change Register/appropriate change history. If a change creates an actual system governance review, use AIG-DEC-04 Gate plan for an intended forum/target; only a dated Gate Event records that it occurred. Associate any resulting condition with its Condition ID and source evidence. The authoritative approval/waiver is AIG-DEC-03/native minutes, not a horizon scan, change-register status or AIG-DEC-04 event label alone.
Risk, action and review links	Material uncertainty, changed applicability, missed deadline or impact on controls/resources should link to the relevant AIG-AIMS-03 risk/treatment or improvement action and be presented to AIG-AIMS-09 when appropriate. Link AIR-ID for affected-system cases and retain Evidence IDs. Do not mark a requirement change implemented/closed without approved affected-document/system/contract/training evidence and effectiveness/closure review.
Requirements that must stay conditional	Keep requirement-specific triggers and status intact, including conditional EU AI Act actor/territorial assessment, case-specific contract duties, specialist-reviewed legal interpretations and guidance that is not law. Draft Bills/policy remain horizon items; proposals and source-currentness do not become Council duties without competent assessment/adoption.
Open adoption checks	Confirm the authority for legal interpretation and Council policy adoption; validate each entry's current source/date, owner, review schedule, affected systems/processes, records retention, evidence location and change-control service level. Reconcile to AIG-AIMS-01 interested-party scope and the exact AIR-ID population only after an approved migration.

PROPOSED QA INDEX — NOT APPROVED. A source reference does not establish applicability or compliance. See AIG-AIMS-05 and AIG-AIMS-13; owners must validate the current source, case-specific scope, control evidence and adopted status.

AIG-AIMS-05 / PROPOSED THREE-ARTEFACT SOURCE CONTRACT

Status	PROPOSED INTEGRATION DESIGN ONLY. This sheet does not amend the artefact's native assessment, decision authority, data or formulas.
Role of this file	Applicable requirements: A map relationship can identify a source requiring specialist applicability review; it is not a legal conclusion, permission or implemented control. Post-adoption suite amendments require a separately confirmed delegated approval route, not merely the requirement-change workflow.
AIG-INV-04 source	Separate AIG-INV-04 AI Register: official AIR-ID, current position, in-file Assessment summary/Evidence index. Reconcile against authoritative AIG-INV-04 before using a copied value.
AIG-DEC-04 source	Separate AIG-DEC-04 Gate Log: prospective Gate plan, dated Gate events, event-linked Conditions. A planned gate is not a decision. A decision requires AIG-DEC-03 or approved minutes and proper delegation.
Map source	Proposed standalone Capabilities and System Map (candidate catalogue ID AIG-INV-05): UC/CAP and component relationship pointers. Edge ID is not an approval or permission; AIG-AGT-04/AIG-AGT-05 remain sources of agent scope/authority.
Data exchange	Use controlled AIR-ID across files. Where applicable reference exact Event ID, Condition ID, Evidence ID, AG-ID and Edge ID. Record source file/version/as-at with imported or quoted evidence; no live cross-workbook formula is assumed.
Change trigger	New or expanded system/tool access, or a material model, data, interface, purpose or agent change: log the map change, obtain owner reassessment and escalate to the proper AIG-DEC-04 gate/AIG-DEC-03 decision when required.
Validation before use	The INTEGRATION INV-04 DEC-04 tab in this workbook is current supporting design guidance (not historical) and holds the detailed join notes. Controlled owners must reconcile real records, validate values and formulas in Excel, and approve migration/cutover; existing Council records remain unchanged until then.
Post-adoption authority gap	UNRESOLVED: AIG-AIMS-05 records requirements/change analysis, but does not name the delegated person or forum that can approve future amendments to an adopted governance suite. Confirm authority, decision record, specialist consultation, effective edition and migration controls under the current Constitution/Scheme of Delegation and AIG-GOV-06 before adoption. Governance Lead custody is not approval.
