# The Council — AI Governance Dashboard

*Controlled point-in-time snapshot. Use-specific measures are counted by UC-ID; AIR-ID (system) counts are labelled as such and never imply UC-ID approval. Each figure displays only when its source, as-at date and checker are recorded (see Measure definitions). UC-ID counts are manually reconciled to the UC-ID current view; no automatic cross-workbook synchronisation.*

| | | | |
|---|---|---|---|
| Reporting period | | Prepared by | |
| **Data as at** | | **Checked by** | |

| Indicator | Current period | Previous period | Trend | RAG | Notes / commentary |
|---|---|---|---|---|---|
| AIR-IDs with ≥1 authorised UC-ID in operation | | | | | |
| UC-IDs awaiting a delegated decision | | | | | |
| Open incidents | | | | | |
| Assurance activities completed | | | | | |
| Outstanding governance actions | | | | | |
| Compliance status (% compliant) | | | | | |
| Benefits realisation measures | | | | | |
| Training and capability indicators | | | | | |

**UC-ID risk classification distribution (effective tier per UC-ID)**

| Risk tier | Number of UC-IDs | Share of UC-IDs |
|---|---|---|
| Critical | | |
| High | | |
| Medium | | |
| Low | | |
| Unclassified / assessment incomplete | | |
| **Total UC-IDs** | | |

**Reconciliation control**

| Check | Extract rows | Dashboard total | Difference | Status | Source extract ID |
|---|---|---|---|---|---|
| UC-ID count | | | | **Incomplete** | |

*Release control: do not circulate this dashboard until the source extract is identified, the data cut is recorded, the checker is named and the UC-ID reconciliation status is Reconciled. A blank count is not zero: enter 0 for an empty tier.*

**Post-deployment live-risk indicators**

| Indicator | Current period | Previous period | Trend | RAG | Notes / commentary |
|---|---|---|---|---|---|
| UC-IDs with overdue reviews | | | | | |
| High/Critical UC-IDs without current monitoring evidence | | | | | |
| UC-IDs outside approved performance, fairness or drift thresholds | | | | | |
| UC-IDs requiring reassessment after breach or material change | | | | | |
| Open High/Critical post-deployment risks | | | | | |

**Use-specific decision snapshot**

| | |
|---|---|
| Systems with system-baseline status Approved (NOT use approvals) | |
| UC-IDs in reconciled snapshot | |
| UC-IDs with UC-specific unconditional Approved decision | |
| UC-IDs with Approved with conditions (not unconditional) | |
| UC-IDs not currently approved: Pending / Deferred / Rejected / Suspended / Retired / expired / not yet effective | |
| UC-IDs Unknown / Unverified / Conflict / missing source or date | |
| Systems with ≥1 unapproved, conditional or unknown use | |

**Portfolio and assessment-quality indicators (Proposed — for Council confirmation)**

| Indicator | Current period | Previous period | Trend | RAG | Notes / commentary |
|---|---|---|---|---|---|
| Largest dependency concentration: share of mapped AIR-IDs relying on one model, data asset, interface/tool or supplier (%) | | | | | |
| Assessor consistency: moderation-sample tier agreement (%) | | | | | |

*Proposed measures (AIG-AIMS-10 M-16 and M-17), entered as percentages from 0 to 100. For the dependency concentration, name the dependency and the High/Critical UC-IDs relying on it in Notes (source: AIG-INV-05 Dependency concentration). Targets and RAG criteria are set by the Council. A blank is not zero.*

# The Council — Dashboard Controlled Inputs

*Enter or paste point-in-time figures here, not on the Dashboard. Each metric must identify its source record, data cut and checker; a figure without them is withheld from the Dashboard. See the Measure definitions sheet. A blank is not zero.*

| | |
|---|---|
| **Reporting period** | |
| **Data as at** | |
| **Source extract ID** | |
| **Source register filename / version** | |
| **Prepared by** | |
| **Checked by** | |
| **Check date** | |

| Indicator | Current period | Previous period | RAG | Source record / file | Source data as at | Reconciled / checked by | Notes |
|---|---|---|---|---|---|---|---|
| AIR-IDs with ≥1 authorised UC-ID in operation | | | | | | | |
| UC-IDs awaiting a delegated decision | | | | | | | |
| Open incidents | | | | | | | |
| Assurance activities completed | | | | | | | |
| Outstanding governance actions | | | | | | | |
| Compliance status (% compliant) | | | | | | | |
| Benefits realisation measures | | | | | | | |
| Training and capability indicators | | | | | | | |

**UC-ID risk classification distribution (count each UC-ID once, at its effective tier, from the UC-ID current view)**

| Risk tier | Current count (UC-IDs) | Previous count | Source record / file | Source data as at | Reconciled / checked by |
|---|---|---|---|---|---|
| Critical | | | | | |
| High | | | | | |
| Medium | | | | | |
| Low | | | | | |
| Unclassified / assessment incomplete | | | | | |

**Portfolio reconciliation**

| Check | Source extract rows (UC-IDs) | Tier distribution total | Difference | Status | Checked by |
|---|---|---|---|---|---|
| UC-ID count | | | | **Incomplete** | |

**Post-deployment live-risk indicators**

| Indicator | Current period | Previous period | RAG | Source record / file | Source data as at | Reconciled / checked by | Notes |
|---|---|---|---|---|---|---|---|
| UC-IDs with overdue reviews | | | | | | | |
| High/Critical UC-IDs without current monitoring evidence | | | | | | | |
| UC-IDs outside approved performance, fairness or drift thresholds | | | | | | | |

| | |
|---|---|
| UC-IDs requiring reassessment after breach or material change | |
| Open High/Critical post-deployment risks | |

Manually reconciled UC-ID snapshot: source evidence and independent check required before counts display. System baseline remains separate.

| Indicator | Current period | Previous period | RAG | Source file / view and reconciliation cut-off | Source as at | Independent reconciler | Notes / exceptions |
|---|---|---|---|---|---|---|---|
| Systems with system-baseline status Approved (NOT use approvals) | | | | | | | |
| UC-IDs in reconciled snapshot | | | | | | | |
| UC-IDs with UC-specific unconditional Approved decision | | | | | | | |
| UC-IDs with Approved with conditions (not counted as unconditional) | | | | | | | |
| UC-IDs not currently approved: Pending / Deferred / Rejected / Suspended / Retired / expired / not yet effective | | | | | | | |
| UC-IDs Unknown / Unverified / Conflict / missing source or date | | | | | | | |
| Systems with ≥1 unapproved, conditional or unknown use | | | | | | | |
| **UC-ID count and source reconciliation (total = sum of the four status buckets above; source / as-at / checker required)** | Incomplete | System baseline Approved count is reported separately and is never summed into UC approvals. | | | | | |

UC-ID current view ‘Derived position’ → UC-ID bucket (Proposed — for Council confirmation)

| Derived position value (UC-ID current view, column W) | Bucket row |
|---|---|
| SOURCE-RECONCILED USE-SPECIFIC APPROVAL — CONFIRM SOURCE | 44 Unconditional Approved |
| CONDITIONAL — NEVER COUNT AS UNCONDITIONAL APPROVAL | 45 Approved with conditions |
| NOT APPROVED / STATUS NOT CURRENT | 46 Not currently approved |
| NOT YET EFFECTIVE | 46 Not currently approved |
| EXPIRED / REVIEW DUE | 46 Not currently approved |
| NOT APPROVED / OUTCOME NOT RECOGNISED | 46 Not currently approved |
| CONDITIONAL — CONDITIONS NOT VERIFIED | 47 Unknown / unverified / conflict |
| CONDITION / OUTCOME CONFLICT | 47 Unknown / unverified / conflict |
| UNVERIFIED / CONFLICT | 47 Unknown / unverified / conflict |
| EVIDENCE INCOMPLETE | 47 Unknown / unverified / conflict |
| DATES NOT VERIFIED | 47 Unknown / unverified / conflict |
| INVALID DATE RANGE | 47 Unknown / unverified / conflict |
| REVIEW INTERVAL EXCEEDS TIER CADENCE | 47 Unknown / unverified / conflict |
| NOT UC-SCOPED | 47 Unknown / unverified / conflict |
| DUPLICATE UC-ID — CONFLICT | 47 Unknown / unverified / conflict |
| TIER / PRIORITY NOT RECOGNISED | 47 Unknown / unverified / conflict |
| UC-ID MISSING | Not counted — fix the row (no UC-ID) |
| Rule | Each UC-ID is counted in exactly one bucket; row 43 must equal the sum of rows 44–47. Row 48 counts AIR-IDs, not UC-IDs. |

| Portfolio and assessment-quality indicators (Proposed — for Council confirmation) | | | | | | | |
|---|---|---|---|---|---|---|---|
| **Indicator** | **Current period** | **Previous period** | **RAG** | **Source record / file** | **Source data as at** | **Reconciled / checked by** | **Notes** |
| Largest dependency concentration: share of mapped AIR-IDs relying on one model, data asset, interface/tool or supplier (%) | | | | | | | |
| Assessor consistency: moderation-sample tier agreement (%) | | | | | | | |

## AIG-OPS-06 — Measure definitions (controlled with this workbook, v1.4 draft)

*Each Dashboard figure must match this definition. Counts are taken at the Controlled Inputs 'Data as at' cut from the named source. A blank means not supplied and is never treated as zero. RAG criteria are proposed defaults for Council confirmation.*

| Ref | Dashboard indicator | What is counted (numerator) | Population / denominator | Unit | Source record and date field | Blank handling | RAG criteria (Proposed — for Council confirmation) | Playbook ref |
|---|---|---|---|---|---|---|---|---|
| M01 | AIR-IDs with ≥1 authorised UC-ID in operation | AIR-IDs (systems) with at least one UC-ID whose current delegated decision authorises operation | All AIR-IDs in AIG-INV-04 | Count of AIR-IDs | AIG-INV-04 AI Register (Operational Status) + UC-ID current view; as-at cut | Blank = not supplied | Not RAG-rated (context measure) | §6.9.7; AIG-OPS-05 |
| M02 | UC-IDs awaiting a delegated decision | UC-IDs with a completed assessment and no recorded delegated decision (Pending) | All UC-IDs in the UC-ID current view | Count of UC-IDs | UC-ID current view (Decision outcome = Pending); AIG-DEC-04 Gate plan target dates | Blank = not supplied | Red: any waiting > 60 days; Amber: any waiting 30–60 days; Green: none > 30 days | §6.9.7 |
| M03 | Open incidents | Incident records not formally closed | All AIG-OPS-03 incident records | Count of incidents | AIG-OPS-03 incident log (status, report date) | Blank = not supplied | Red: any open High/Critical incident; Amber: any other open incident; Green: none | §6.6; D8 |
| M04 | Assurance activities completed | Planned assurance activities completed in the period | Assurance activities planned for the period | Count (state n of N in Notes) | AIMS monitoring plan / AIG-DEC-04 Gate plan (Plan state) | Blank = not supplied | Green ≥ 90% of plan; Amber 75–89%; Red < 75% | §6.9 |
| M05 | Outstanding governance actions | Open AIG-DEC-04 conditions and AIMS actions past due at the as-at cut (Overdue derived, not typed) | All open conditions and actions | Count | AIG-DEC-04 Conditions (State, Due date); AIG-AIMS-08 | Blank = not supplied | Red: any High/Critical UC-ID affected; Amber: any other UC-ID affected; Green: none | Annex G.2 |
| M06 | Compliance status (% compliant) | Controls or requirements assessed as compliant | Controls or requirements assessed in the period | Percentage 0–100 (enter 85 for 85%) | AIG-AIMS-06 conformity register; AIG-ASS-03 checklist results | Blank = not supplied; not assessed ≠ compliant | Green ≥ 95; Amber 85–94; Red < 85 | §6.9 |
| M07 | Benefits realisation measures | UC-IDs meeting their approved benefit measure | UC-IDs with an approved benefit measure | Count (state n of N in Notes) | AIG-OPS-02 Monitoring Log (Metric Category = Benefits / Outcomes) | Blank = not supplied | Green ≥ 80%; Amber 60–79%; Red < 60% | §6.4 |
| M08 | Training and capability indicators | Staff in AI roles with required training current | Staff in AI roles (AIG-AIMS-04) | Percentage 0–100 | AIG-AIMS-04 competence records | Blank = not supplied | Green ≥ 90; Amber 75–89; Red < 75 | §5; ISO/IEC 42001 7.2 |
| M09 | UC-ID risk classification distribution | UC-IDs by effective governance tier (Critical/High/Medium/Low) plus Unclassified | All UC-IDs in the UC-ID current view | Count of UC-IDs | UC-ID current view (Risk tier), from AIG-ASS-02 | Enter 0 for an empty tier; a blank tier count stops reconciliation | Not RAG-rated | §4.4.8; §6.9.7 |
| M10 | UC-IDs with overdue reviews | UC-IDs whose next review date is before the as-at cut | All UC-IDs in operation | Count of UC-IDs | AIG-OPS-02 Monitoring Log (Next Review Date, Risk tier) | Blank = not supplied | Red: any High/Critical UC-ID affected; Amber: any other UC-ID affected; Green: none | E.6; D3 cadences |
| M11 | High/Critical UC-IDs without current monitoring evidence | High/Critical UC-IDs with no monitoring row inside the tier cadence (High quarterly; Critical monthly formal review) | High/Critical UC-IDs in operation | Count of UC-IDs | AIG-OPS-02 Monitoring Log (Review Date, Risk tier) | Blank = not supplied | Red: any; Green: none | E.6; D3 |
| M12 | UC-IDs outside approved performance, fairness or drift thresholds | UC-IDs with a threshold breach (Threshold Breach? = Yes) in the period | UC-IDs monitored in the period | Count of UC-IDs | AIG-OPS-02 Monitoring Log (Threshold Breach?, Metric Category) | Blank = not supplied; Unknown is reported separately in Notes | Red: any High/Critical UC-ID affected; Amber: any other UC-ID affected; Green: none | E.6 |

| Ref | Dashboard indicator | What is counted (numerator) | Population / denominator | Unit | Source record and date field | Blank handling | RAG criteria (Proposed — for Council confirmation) | Playbook ref |
|---|---|---|---|---|---|---|---|---|
| M13 | UC-IDs requiring reassessment after breach or material change | UC-IDs with Risk Reassessment Required? = Yes not yet reassessed | UC-IDs in operation | Count of UC-IDs | AIG-OPS-02 Monitoring Log (Reassessment trigger, Risk Reassessment Required?, Reassessment ref) | Blank = not supplied | Red: any High/Critical UC-ID affected; Amber: any other UC-ID affected; Green: none | E.4; E.6 |
| M14 | Open High/Critical post-deployment risks | High/Critical residual risks open after post-deployment review | UC-IDs in operation | Count of risks | AIG-OPS-02 (Residual Risk After Review); AIG-ASS-02 | Blank = not supplied | Red: any; Green: none | E.6 |
| M15 | UC-ID decision snapshot (rows 41–46) | UC-IDs by Derived position bucket (mapping table on Controlled Inputs) | All UC-IDs in the reconciled UC-ID current view | Count of UC-IDs (row 46 counts AIR-IDs) | UC-ID current view (Derived position at its as-at date) | Displayed only when reconciliation = Reconciled | Not RAG-rated | §3.10.4; D6 |
| M16 | Largest dependency concentration (share of mapped AIR-IDs) | Largest share of AIR-IDs relying on any one model, data asset, interface/tool or supplier; name the dependency and the High/Critical UC-IDs relying on it in Notes | Distinct AIR-IDs on the AIG-INV-05 System map (components) or in the controlled AIG-INV-04 extract (suppliers) | Percentage 0–100 (enter 40 for 40%) | AIG-INV-05 Dependency concentration (Largest share overall; confirmed, QA-clean links only) at its as-at date; AIG-AIMS-10 M-16 | Blank = not supplied; zero is not absence of a dependency | Not RAG-rated until the Council sets the threshold for concern in AIG-INV-05; flagged concentrations are reported to the AI Assurance Board (Proposed — for Council confirmation) | §4.5.8; AIG-OPS-05 |
| M17 | Assessor consistency (moderation-sample tier agreement) | Moderation-sample assessments where the second assessor's tier matches the original | Medium and Low assessments in the quarter's moderation sample (second assessor does not see the original scores) | Percentage 0–100 | Moderation sample records (original and second-assessor tiers, AIG-ASS-02); AIG-AIMS-10 M-17 | Blank = not supplied; no sample is not full agreement | Target and RAG criteria set by the Council; any whole-band difference is reviewed by the AI Governance Working Group (Proposed — for Council confirmation) | Assessor consistency (Playbook §4.4.9); AIG-AIMS-10 M-17 |

# AIG-OPS-06 — Document Control

*Controlled working template. Draft for Council review; not Council-adopted and not effective until formally approved.*

| Field | Controlled value |
|---|---|
| **Document ID** | AIG-OPS-06 |
| **Artefact** | AI Governance Dashboard |
| **Version** | 1.4 draft |
| **Status** | Draft for Council review |
| **Document owner** | AI Governance Lead |
| **Approving body** | Competent Council authority under Constitution and Scheme of Delegation; AI Assurance Board provides assurance where applicable |
| **Approval date** | Not yet approved |
| **Effective date** | Not yet effective |
| **Next review date** | To be set on approval: 12 months after effective date or sooner following material change |

**Change history**

| Version | Date | Change | Author / owner |
|---|---|---|---|
| 1.0 draft | 6 August 2026 | Step 4.3 spreadsheet QA controls and document-control baseline established. | AI Governance Lead |
| 1.1 draft | 6 August 2026 | Formula guard added so blank portfolio totals display blank rather than an error. | AI Governance Lead |
| 1.2 draft | Not recorded in source | Not recorded in source (placeholder added during QA remediation so the history is continuous). | Not recorded in source |
| 1.3 draft | 29 September 2026 | QA remediation — applied findings QA-102, QA-212, QA-218, QA-237, QA-240, QA-251, QA-273, QA-274, QA-275, QA-280, QA-286, QA-291 (see QA change log). | AI Governance Lead |
| 1.4 draft | 30 September 2026 | v3.9: added proposed indicators M16 (largest dependency concentration, from AIG-INV-05; AIG-AIMS-10 M-16) and M17 (assessor consistency; AIG-AIMS-10 M-17): Controlled Inputs rows 72 to 75, Dashboard rows 48 to 52 with the same release control (withheld until source, as-at and checker are recorded) and Measure definitions rows 20 to 21. Proposed — for Council confirmation. | AI Governance Lead |

*Classification: OFFICIAL. Approval, effective and review dates must be completed by the document owner following formal governance approval.*

## AIG-OPS-06 — PROPOSED AIG-INV-04/AIG-DEC-04 INTEGRATION NOTES

*NOT APPROVED — additive integration annex only; existing workbook content and formulas are retained unchanged. AIG-INV-04 (AI Register) and AIG-DEC-04 (Gate Log) are themselves proposed designs: until the Council approves their adoption and migration, the Council's existing records remain authoritative and the AIG-INV-04/AIG-DEC-04 joins below are design references only. No live system, event, evidence, approval or Council decision is asserted.*

| Contract area | Authoritative key / authority | Link / required handling and trigger |
|---|---|---|
| **Portfolio authority / key** | AIG-INV-04 AI Register is the proposed system-level source; AIR-ID is the permanent join key. AIG-OPS-06 is a point-in-time reporting snapshot, not a competing register. | Use the AIG-INV-04 source filename/version, extract ID, reconciliation date, reporting period and data-as-at cut in Controlled Inputs. Keep source row counts and checker evidence. |
| **AIG-INV-04 AI Register and Assessment summary extract** | Reconcile the extract to AIG-INV-04 AI Register and the associated Assessment summary for the same AIR-ID population and data cut. Include relevant lifecycle/approval, risk and assurance indicators only after source validation. | Identify the AIG-INV-04 filename/version and extract ID; record source data-as-at, preparer, independent checker and check date. Preserve source references per indicator and reconcile count totals before reporting. |
| **AIG-DEC-04 gate plan / events / conditions** | For gate coverage, use AIG-DEC-04 Gate plan (requirements and state), Gate events (dated decisions), and Conditions (open/resolved/overdue obligations) for the same AIR-ID and snapshot cut. Gate Map is a derived aid, not primary evidence. | Reconcile each extract and its version/data cut to the AIG-INV-04 snapshot; retain query/extract reference, cut time, row counts, preparer/checker and reconciliation outcome. Distinguish planned gates from final events and open conditions. |
| **Dashboard reporting contract** | Dashboard figures are controlled-input snapshot values and formulas remain unchanged. Every figure must identify the source record/file, source data-as-at and who reconciled it. | Do not report unreconciled or mixed-cut values. If AIG-INV-04/AIG-DEC-04 data are missing, stale or inconsistent, flag/investigate in Notes and withhold a reconciled claim; never infer gate completion from a plan. |
| **Change and refresh** | A refreshed dashboard is a new dated extract/snapshot; preserve prior cut and source/version identifiers for auditability. | Re-run the reconciliation when AIG-INV-04 AI Register/Assessment summary or AIG-DEC-04 plans/events/conditions change; record the new extract ID, reporting period, data cut and independent check. |

PROPOSED QA INDEX — NOT APPROVED. A source reference does not establish applicability or compliance. See AIG-AIMS-05 and AIG-AIMS-13; owners must validate the current source, case-specific scope, control evidence and adopted status.

| Requirement ID | Instrument / edition | Conditional scope / relevance | Source URL | Owner validation status |
|---|---|---|---|---|
| REQ-036 | Algorithmic Transparency Recording Standard (ATRS) | Central-government mandatory scope is distinct from proposed local-authority adoption. | https://www.gov.uk/government/publications/guidance-for-organisations-using-the-algorithmic-transparency-recording-standard/algorithmic-transparency-recording-standard-guidance-for-public-sector-bodies | Specialist validation required |
| REQ-040 | ISO/IEC 42001:2023 Artificial intelligence management system | Proposed management-system design mapping; licensed clause review and adoption needed. | https://www.iso.org/standard/42001 | Specialist validation required |

## AIG-OPS-06 / PROPOSED THREE-ARTEFACT SOURCE CONTRACT

| | |
|---|---|
| **Status** | PROPOSED INTEGRATION DESIGN ONLY. This sheet does not amend the artefact's native assessment, decision authority, data or formulas. |
| **Role of this file** | Estate dashboard: Source counts from a dated AIG-INV-04 extract, gate events/conditions from a separate dated AIG-DEC-04 extract, and map coverage only from confirmed, QA-clean map links. Label each extract/version/as-at; never infer approval from map counts. |
| **AIG-INV-04 source** | Separate AIG-INV-04 AI Register: official AIR-ID, current position, in-file Assessment summary/Evidence index. Reconcile against authoritative AIG-INV-04 before using a copied value. |
| **AIG-DEC-04 source** | Separate AIG-DEC-04 Gate Log: prospective Gate plan, dated Gate events, event-linked Conditions. A planned gate is not a decision. A decision requires AIG-DEC-03 or approved minutes and proper delegation. |
| **Map source** | Proposed standalone Capabilities and System Map (candidate catalogue ID AIG-INV-05): UC/CAP and component relationship pointers. Edge ID is not an approval or permission; AIG-AGT-04/AIG-AGT-05 remain sources of agent scope/authority. |
| **Data exchange** | Use controlled AIR-ID across files. Where applicable reference exact Event ID, Condition ID, Evidence ID, AG-ID and Edge ID. Record source file/version/as-at with imported or quoted evidence; no live cross-workbook formula is assumed. |
| **Change trigger** | New or expanded system/tool access, or a material model, data, interface, purpose or agent change: log the map change, obtain owner reassessment and escalate to the proper AIG-DEC-04 gate/AIG-DEC-03 decision when required. |
| **Validation before use** | The INTEGRATION INV-04 DEC-04 tab in this workbook is current supporting design guidance (not historical) and holds the detailed join notes. Controlled owners must reconcile real records, validate values and formulas in Excel, and approve migration/cutover; existing Council records remain unchanged until then. |
