Operating notes

Purpose	Supplementary, manually source-reconciled current view: one row per UC-ID showing its risk tier, delegated decision, conditions, dated AIG-DEC-04 event and monitc in the AI Governance Dashboard (AIG-OPS-06).
Status of the view	Supplementary view, not a 53rd catalogue artefact and not a decision record. AIG-DEC-03 (or approved minutes) remains the authoritative decision record; AIG-DEC- the system record.
Refresh cadence	Refresh and independently check before each AIG-OPS-06 dashboard cut and at least monthly while any Critical UC-ID is in operation; record the As-at date in W1.
Controlled vocabularies	Decision outcome (H) = the AIG-DEC-03 outcomes plus Pending/Unknown. Condition state (O) = None / Open / Closed-verified / Accepted-open / Waived / Unknown, AIG-DEC-04 Conditions sheet. AIG-DEC-04 gate outcomes map to these outcomes on the AIG-DEC-04 Lists sheet.
Tier cadence check	Next review date minus effective date must not exceed the minimum cadence for the tier: Critical monthly formal review (31 days), High quarterly (92 days), Medium a D3.
