Governance Decision Record

Decision scope — record one permanent AIR-ID for the system and the UC-ID(s) expressly covered. For each UC-ID record distinct outcome (approve, approve with conditions, defer, reject, suspend or retire), risk/assessment reference, permitted purpose/users/data/actions, exclusions, conditions, delegated authority/delegation reference, effective/expiry/review dates and Gate Event ID. A system-baseline decision does not approve every use; cite approved minutes where they are the authoritative record.

The Council · AI Governance Playbook (Level 5 document, §3.10.4)

An auditable record of a significant AI governance decision.

Use this record to document any significant governance decision. Identify the parent AIR-ID and expressly covered UC-ID(s); give each use its own outcome, permitted scope and conditions in the use-specific decision schedule. A system-level decision does not cover an unlisted or materially changed use. Retain with the AI Register record (Playbook §3.10.4).

Governance record, not a second evidence pack: Service Owners and specialists provide the decision input and evidence they own; the record references existing evidence by AIR-ID rather than reproducing it.

1. Decision Reference

Decision record ID	GDR-XXXX
System identity	See AI Register (AIG-INV-04) under the AIR-ID below.
UC-ID(s) expressly covered	Record separate outcome, permitted scope, conditions and authority for each.
AIR-ID	AIR-XXXX
Decision date	
Decision-making body	The officer or Council forum holding confirmed delegation (Service Owner/Service Manager only if delegated); the AI Assurance Board provides assurance and recommendations and does not approve
Risk classification	Record risk classification and assessment reference separately for each UC-ID in the schedule below.
Decision authority / delegation reference	Terms of reference, scheme of delegation or delegated limit relied upon
Meeting / written-decision reference	Agenda/minute reference or controlled written-decision location

2. Decision

Decision	No global/system outcome. Record a separate decision outcome for each covered UC-ID in the schedule below.
UC-ID decision schedule (repeat for each use)	UC-ID: ____ | decision scope: UC-ID specific / Shared system baseline (a shared baseline decision is not use approval) | decision date: ____ | outcome: Approved / Approved with conditions / Deferred / Rejected / Suspended / Retired | exact scope/exclusions: ____ | assessment/risk: ____ | conditions: ____ | delegated authority: ____ | effective/expiry/review: ____ | Gate Event ID: ____
Priority override (only if this record authorises one)	AIR-ID / UC-ID: ____ | AGPI priority before: ____ | priority after: ____ | reason: ____ | delegated authority: ____ | Assurance priority update reference: ____ | Gate Event ID (Event type “Priority override”): ____. The AGPI score is not changed; the override is this decision.

Summary of the decision and the reasoning

3. Assessment Findings Considered

Assessments reviewed (tick all considered)

☐ DPIA ☐ EIA ☐ Human Rights Assessment ☐ Responsible AI Assessment

☐ Equality, human rights and data protection screening (including any by reference: Evidence ID _____) — seen and considered by the decision-maker before deciding

☐ Security review ☐ Legal review ☐ Model Card ☐ Other

Key findings that informed the decision

4. Conditions, Actions and Review

Conditions of approval

Assigned actions, owners and due dates

Action	Owner	Due date

Review requirements	Next review date / trigger
Escalation requirements (if any)	
Action closure status and evidence	For each condition or action, state (controlled list shared with AIG-DEC-04 and the UC-ID current view): Open / Closed-verified / Accepted-open / Waived / Unknown; closure or acceptance date, verifier and evidence reference. Accepted-open and Waived require the delegated decision-maker's authority.
Conditions verified by / date	Name, role, date and verification evidence
Decision effective date / expiry	Effective date and any expiry, sunset or mandatory re-approval date

5. Authorisation

Recorded by	
Chair / approver name	
Signature	
Date	
Authority confirmed against delegated limits	Yes / No — reference the applicable authority
Quorum requirement and confirmation	Required quorum; members present; quorum met Yes / No / N/A
Attendees / voting members	Names, roles and voting status
Conflicts of interest	Declarations made, affected item and how each conflict was managed
Evidence pack	Controlled location, pack version/date and papers considered
Dissent, challenge or abstention	Record material challenge, minority view, abstention and response

Agentic approval condition: if the system can act, reference the AIG-AGT-02/AIG-AGT-03 five-dimension profile, separate agency multipliers, AIG-ASS-11 ASI01–ASI10 applicability and findings, AIG-AGT-04 required/actual runtime control states and tests, AIG-OPS-01 go-live scope, and AIG-OPS-02 monitoring owner and thresholds. State the exact authorised authority envelope and pilot or production scope. The approving person/forum must be the one with confirmed Council delegation; the AI Assurance Board contributes an assurance opinion. Record any effective compensating control with owner, test evidence, residual risk, expiry and gate review in AIG-DEC-04. Do not approve consequential production autonomy on Specified or Designed controls.

Document control

Administrative control record. This artefact remains a working draft until formally approved.

Field	Controlled value
Document ID	AIG-DEC-03
Version	1.12 draft
Status	Draft for Council review
Document owner	AI Governance Lead

Field	Controlled value
Approving body	Pending confirmation — Competent Council authority under Constitution and Scheme of Delegation; AI Assurance Board provides assurance where applicable; exact delegation and publication authority to be verified by Monitoring Officer.
Approval date	Not yet approved
Effective date	Not yet effective
Next review date	To be set on approval: 12 months after the effective date, or sooner following material change
Classification	OFFICIAL

Change history

Version	Date	Change summary	Owner
1.0 draft	6 August 2026	Document-control baseline established following full-suite quality assurance; no substantive content change.	AI Governance Lead
1.1 draft	6 August 2026	QA revision: added authority, quorum, conflict, evidence-pack and action-closure controls.	AI Governance Lead
1.2 draft	20 September 2026	Clarified that the Governance Decision Record is a concise governance record and should reference existing evidence rather than recreate it.	AI Governance Lead
1.3 draft	25 September 2026	Clarified agentic decision evidence, pilot scope and delegated decision rights.	AI Governance Lead
1.4 draft	29 September 2026	Added a Priority override line to the decision section: priority before and after, reason, authority and Assurance update reference, linked to the AIG-DEC-04 Gate Event with Event type “Priority override”.	AI Governance Lead
1.5 draft	29 September 2026	QA remediation — applied findings QA-095, QA-168, QA-172, QA-185, QA-200, QA-221 (see QA change log). Controlled condition/action state list; decision-maker wording aligned with delegated authority; REQ-007 source corrected; legacy table captions and working note removed. v3.7 alignment: agentic evidence list records the permitted autonomy level granted at Gate 6 and the agency-tier minimum pathway.	AI Governance Lead
1.6 draft	30 September 2026	v3.9.1: standards cross-reference note updated to the 54-entry requirement inventory (AIG-AIMS-05 REQ-054, Civil Contingencies Act 2004, added).	AI Governance Lead
1.7 draft	1 October 2026	v3.9.3: standards cross-reference note cites the 55-entry requirement inventory (AIG-AIMS-05 REQ-055, NIST AI 600-1 Generative AI Profile, added).	AI Governance Lead
1.8 draft	2 October 2026	v3.9.5: standards cross-reference note cites the 56-entry requirement inventory (AIG-AIMS-05 REQ-056, SI 2026/425 ICO statutory code of practice on AI and automated decision-making, added). Proposed — for Council confirmation.	AI Governance Lead
1.9 draft	3 October 2026	v3.9.7: “Assessments reviewed” adds the equality, human rights and data protection screening, including any done by reference, which the decision-maker confirms was seen and considered before deciding (Playbook §4.6). Proposed — for Council confirmation.	AI Governance Lead
1.10 draft	3 October 2026	v3.9.8: guidance on lifting a precautionary pause: record the outcome as Approved (or Approved with	AI Governance Lead

Version	Date	Change summary	Owner
		conditions) and log the AIG-DEC-04 Gate event with the new Outcome “Resume” (Playbook §4.7.17). Proposed — for Council confirmation.	
1.11 draft	4 October 2026	v3.9.9: agentic evidence names the Agent Record level and Record QA, and the Authority Graph where delegations exist or at T3 and above (Playbook F.3). Proposed — for Council confirmation.	AI Governance Lead
1.12 draft	12 October 2026	v3.9.10: standards cross-reference note cites the 58-entry requirement inventory (AIG-AIMS-05 REQ-057 DAMA-DMBOK and REQ-058 ISO/IEC 5259, added as voluntary data governance references). Proposed — for Council confirmation.	AI Governance Lead

Agentic assurance evidence (where applicable)

• Agent identity/version and AIR-ID; Agent Record level (Core / Core plus features / Full) and Record QA OK
• Authority Graph reference and delegation depth (where the agent delegates, or at T3 and above)
• Capability Vector approval
• Permitted autonomy level per UC-ID (granted at Gate 6 go-live; written to AIG-AGT-04) and Agency Tier rationale, including the minimum risk-tier pathway it sets (AIG-DEC-01 Agentic pathway)
• Tool/Interface Authority Registry references
• Memory controls and isolation evidence
• Runtime control state: Designed / Specified / Implemented / Evidenced
• Containment/kill-switch test reference and time-to-containment
• Action logging / Agentic Decision Record reference
• Reversibility or compensating-action assessment
• Multi-agent recursion, budget and termination controls
• Model routing/fallback configuration and evidence

Approval condition: where required runtime controls are not Implemented and Evidenced, the decision record must not represent them as operational controls. Any compensating control must be explicit, time-bounded and approved by the relevant delegated authority.

PROPOSED INTEGRATION ADDITIONS — REVIEW REQUIRED

Proposed map citation — descriptive context only

AIG-INV-05 may be cited as a dated descriptive snapshot of the use case/capability/system context considered, with its workbook version, map row/Edge ID and verification date. It is not decision evidence by itself and cannot establish scope, authority, risk acceptance or approval. The decision-maker and rationale remain in this record and/or approved minutes; link an actual AIG-DEC-04 Event and its Conditions only after the event occurs. Update current status in AIG-INV-04 only after the authorised decision.

This integrated draft includes revisions to body content above; the annex below is supplementary proposed content for Council review. This draft and annex do not record live facts, completed actions, delegated authority, Council adoption or approval.

PROPOSED decision traceability and single-source identity

Read system name, owner, service area and current governance/operational state from AIG-INV-04 under the permanent Council-issued AIR-ID. Do not create a second identity/status record. If AIR-ID is pending, retain the provisional intake reference separately; it is not registration.

For a meeting decision cite meeting date, forum, agenda/item and native approved minutes (or controlled authoritative minutes record), including the resolution and conditions. For a written decision cite its controlled location and evidence of the decision-maker's delegation. A prepared summary or assurance opinion is not a substitute for the authority record.

PROPOSED condition-level ownership and closure evidence

Give every condition a distinct reference, required outcome, one accountable owner, due date, evidence reference/source, verifier and verification date. Cross-reference the corresponding AIG-DEC-04 action/gate entry; do not attach duplicate evidence.

Close only when specified evidence exists and an authorised verifier records outcome, actual closure date and evidence reference. Distinguish "Accepted-open" from "Closed-verified" (controlled states: Open / Closed-verified / Accepted-open / Waived / Unknown); record accepting delegated authority, scope, rationale, residual risk, owner, deadline and escalation/review trigger. Assurance commentary cannot close mandatory controls.

In AIG-DEC-04 preserve planned dates as plans and actual events as separate dated, attributable events (decision, verification, gate outcome, go-live). Never overwrite a planned milestone with an actual date or infer a decision from checklist completion. To lift a precautionary pause with the use's approval unchanged, record the outcome as Approved (or Approved with conditions where new conditions are set) and log the AIG-DEC-04 Gate event with Outcome "Resume" (Playbook §4.7.17).

Review points — not yet decided

Confirm authoritative Council minutes store, when draft minutes are acceptable, written-decision retention, condition-reference format and delegated roles permitted to accept open conditions at go-live. This annex records no decision, delegation, approval or closure.

Standards and legal applicability — proposed QA cross-reference

PROPOSED QA INDEX — NOT APPROVED LEGAL ADVICE OR EVIDENCE OF COMPLIANCE. The listed instruments may be relevant to this artefact, but applicability depends on the case, service and Council delegation. Legislation, official guidance, Council policy and voluntary standards are different authority classes. The full 58-entry requirement inventory, authoritative URLs, validation owners and current versions are in AIG-AIMS-05; source checks are in AIG-AIMS-13. Do not treat a template, plan or cross-reference as completed assessment, adopted policy, ISO conformity or legal sign-off.

Requirement / instrument	Why check it here	Source
REQ-006 — Human Rights Act 1998	Public-authority compatibility under s.6; assess Convention rights engaged by the case.	https://www.legislation.gov.uk/ukpga/1998/42/contents
REQ-007 — Administrative law, statutory powers, procedural fairness and reasoned decision-making	Screen the public-law requirement against this artefact's actual use and record evidence/version.	Common law and statute: Legal Services to confirm (see, for example, Government Legal Department, The Judge Over Your Shoulder)
REQ-013 — Local Government Act 1972 (including section 101) and The Council's constitution and scheme of delegation	For actual Council decision/approval, verify the current Constitution and delegation.	https://www.legislation.gov.uk/ukpga/1972/70/contents
REQ-045 — Council Constitution, executive arrangements, schemes of delegation and committee procedure rules	Screen the Council Constitution / Scheme of Delegation requirement against this artefact's actual use and record evidence/version.	Current Council Constitution / Scheme of Delegation reference, approved governance records and delegation evidence
