The Council — AIMS Management Review

AIG-AIMS-09 · v1.1 draft · Draft for Council review · OFFICIAL · ISO/IEC 42001:2023 clause 9.3

Purpose: set how top management reviews the AI Management System at planned intervals to confirm it remains suitable, adequate and effective. This pack provides the procedure, the required inputs (9.3.2), the required outputs (9.3.3) and a review record to complete at each meeting.

Status statement: draft design. No management review has been held or evidenced. The record tab is a blank template to be completed at the first review. Clause references are plain-language working descriptions and must be validated against the Council's licensed copy of the standard.

Document control	Controlled value
Document ID	AIG-AIMS-09
Version	1.1 draft
Status	Draft for Council review
Document owner	AI Governance Lead
Chaired by	Chair, AI Assurance Board (top management; chair to be confirmed by the Council, proposed: Executive Sponsor)
Approving authority	Competent Council authority under Council delegations; AI Assurance Board provides assurance
Frequency	At least annually, and after material change or a significant incident
Effective date	Pending formal approval
Source position	AIG-AIMS-06 clause 9.3; inputs from AIG-AIMS-02, AIG-AIMS-03, AIG-AIMS-05, AIG-AIMS-07 and the Register
Classification	OFFICIAL

Procedure
1. The AI Governance Lead convenes the review at the planned interval and prepares the input pack from the sources listed in the Inputs (9.3.2) tab.
2. Top management (the Board) reviews each input and judges whether the AIMS remains suitable, adequate and effective.
3. Decisions are recorded as the outputs required by clause 9.3.3: improvement opportunities and any changes needed to the AIMS, including resources.
4. Outputs are assigned owners and dates and tracked to closure through the Improvement Plan (AIG-AIMS-03) and, where relevant, corrective action.
5. The completed Review Record is retained as documented information; open actions carry into the next review.

Version / date	Change
1.0 draft — 2026-08-07	Initial management review pack (procedure, inputs, outputs, record) created to close the clause 9.3 gap identified in AIG-AIMS-06.
1.1 draft — 2026-09-29	QA remediation — applied findings QA-186, QA-218, QA-219, QA-240, QA-241, QA-251, QA-285, QA-291 and decisions D1/D2 (see QA change log).

#	Required input (clause 9.3.2)	Source in the suite	Prepared by	Notes / to bring to the review
a	Status of actions from previous management reviews	Prior Review Records; Improvement Plan	AI Governance Lead	
b	Changes in external and internal issues relevant to the AIMS	AIG-AIMS-01 context; AIG-AIMS-05 change register and horizon scanning	AI Governance Lead	
c	Changes in needs and expectations of interested parties	AIG-AIMS-01; AIG-AIMS-05 applicable requirements	AI Governance Lead / Legal	
d	Extent to which AI objectives have been met	AIG-AIMS-03 objectives and measures	AI Governance Lead	
e	AIMS performance: nonconformities and corrective actions	Findings Register (AIG-AIMS-07); CAPA log (AIG-AIMS-08)	AI Governance Lead	
f	AIMS performance: monitoring and measurement results	AIG-OPS-06 dashboard; AIG-OPS-05 reporting; §3.11 measures	AI Governance Lead	
g	AIMS performance: audit results	Internal audit reports (AIG-AIMS-07)	Assigned auditor	
h	Fulfilment of legal and other requirements	AIG-AIMS-05 applicable requirements and validation status	AI Governance Lead / Legal	
i	Adequacy of resources for the AIMS	AIG-AIMS-04 roles and competence; improvement plan	AI Assurance Board	
j	Effectiveness of actions taken to address risks and opportunities	AIG-AIMS-03 risk treatment and opportunities; SoA (AIG-AIMS-02)	AI Governance Lead	
k	Opportunities for continual improvement	AIG-AIMS-03 improvement plan; audit observations	AI Governance Lead	
l	Relevant AI incidents and their handling	Incident records (AIG-OPS-03); §6.8	AI Governance Lead	

The lettered inputs mirror the matters clause 9.3.2 requires the review to consider; validate the exact list against the Council's licensed copy of ISO/IEC 42001:2023.

#	Required output (clause 9.3.3)	Decision / action recorded	Owner	Target date	Status
1	Opportunities for continual improvement identified and agreed				Open
2	Any need for changes to the AIMS				Open
3	Resource needs identified				Open

Outputs are tracked to closure through the Improvement Plan (AIG-AIMS-03) and corrective action where a nonconformity is involved. Carry open items into the next review.

AIG-AIMS-09 — PROPOSED AIG-INV-04/AIG-DEC-04 INTEGRATION NOTES

NOT APPROVED — additive integration annex only; existing workbook content and formulas are retained unchanged. AIG-INV-04 (AI Register) and AIG-DEC-04 (Gate Log) are themselves proposed designs: until the Council approves their adoption and migration, the Council's existing records remain authoritative and the AIG-INV-04/AIG-DEC-04 joins below are design references only. No live system, event, evidence, approval or Council decision is asserted.

Review topic	Targeted proposed integration note
Status / review boundary	This pack is a designed agenda/input/output and a blank record. No management review, top-management judgement, minutes, action, resource decision or approval is claimed. Use the review record only after the confirmed top-management authority and planned interval are approved; retain the actual signed/authorised record in its controlled location.
Portfolio inputs: AIG-INV-04 system view	Prepare a dated, reproducible inventory/assurance snapshot from proposed AIG-INV-04 by AIR-ID: scope/owner/lifecycle/current state, review dates, priorities, risk and evidence completeness. State population, exclusions, query/as-at date and data-quality exceptions. The approved-tools view is not a complete AIMS population; do not present draft structure or blank rows as live performance.
Events and conditions: AIG-DEC-04	For actual gate activity, reconcile AIG-DEC-04 Gate events (dated history), Conditions (open, overdue, met/waived with required evidence/authority), and relevant AIG-DEC-03/native decisions. Gate plan is prospective only. Show plan/actual status separately, link evidence IDs, expose current-state/event mismatches, and do not call planned or proposed events completed review inputs.
Input-to-source accountability	For each review input retain its authoritative source and reporting period: AIG-AIMS-01 context/scope, AIG-AIMS-05 validated requirements/change, AIG-AIMS-03 objectives/risk/treatment, AIG-AIMS-02 SoA, AIG-AIMS-04 roles/resources, AIG-AIMS-07 audit, AIG-AIMS-08 CAPA, AIG-AIMS-10/AIG-OPS-02 monitoring, AIG-OPS-03 incidents, and AIG-INV-04/AIG-DEC-04 joins where system-level facts apply. An AIMS-wide issue may have no AIR-ID. Avoid copying underlying personal or restricted evidence into the review pack.
Outputs and event linkage	Record actual top-management decisions, changes and resource needs in the Review Record/Outputs and authoritative minutes. Assign an action ID/owner/due date in AIG-AIMS-03 (or AIG-AIMS-08 for corrective action as appropriate), then point to its source Evidence ID and AIR-ID where system-specific. Create an AIG-DEC-04 Gate Event only if an actual system gate/forum event occurs; do not duplicate the management-review record or imply that its action is a system approval.
Effectiveness and carry-forward	At the next review test action status and intended outcome against source evidence, not status labels alone. Check risks, objectives, open/overdue conditions, NC/CAPA effectiveness, audit results, requirements and resource adequacy. Preserve decision date, owner, delegated authority, evidence, due date and disposition; overdue/unverified actions remain open and should be escalated through approved governance.
Open adoption checks	Confirm review chair/top-management identity, authority, frequency, required inputs, evidence repository, secure access, reporting population, objective baselines and the AIG-INV-04/AIG-DEC-04 migration/reconciliation protocol. Validate clause 9.3 wording against the licensed standard before making conformity claims.

PROPOSED QA INDEX — NOT APPROVED. A source reference does not establish applicability or compliance. See AIG-AIMS-05 and AIG-AIMS-13; owners must validate the current source, case-specific scope, control evidence and adopted status.

Requirement ID	Instrument / edition	Conditional scope / relevance	Source URL	Owner validation status
REQ-013	Local Government Act 1972 (including section 101) and The Council's constitution and scheme of delegation	For actual Council decision/approval, verify the current Constitution and delegation.	https://www.legislation.gov.uk/ukpga/1972/70/contents	Specialist validation required
REQ-040	ISO/IEC 42001:2023 Artificial intelligence management system	Proposed management-system design mapping; licensed clause review and adoption needed.	https://www.iso.org/standard/42001	Specialist validation required

AIG-AIMS-09 / PROPOSED THREE-ARTEFACT SOURCE CONTRACT

Status	PROPOSED INTEGRATION DESIGN ONLY. This sheet does not amend the artefact's native assessment, decision authority, data or formulas.
Role of this file	Management review: Report separate AIG-INV-04 status, AIG-DEC-04 event/condition backlog and proposed map coverage, with as-at dates, source versions and unresolved gaps; do not call design adoption.
AIG-INV-04 source	Separate AIG-INV-04 AI Register: official AIR-ID, current position, in-file Assessment summary/Evidence index. Reconcile against authoritative AIG-INV-04 before using a copied value.
AIG-DEC-04 source	Separate AIG-DEC-04 Gate Log: prospective Gate plan, dated Gate events, event-linked Conditions. A planned gate is not a decision. A decision requires AIG-DEC-03 or approved minutes and proper delegation.
Map source	Proposed standalone Capabilities and System Map (candidate catalogue ID AIG-INV-05): UC/CAP and component relationship pointers. Edge ID is not an approval or permission; AIG-AGT-04/AIG-AGT-05 remain sources of agent scope/authority.
Data exchange	Use controlled AIR-ID across files. Where applicable reference exact Event ID, Condition ID, Evidence ID, AG-ID and Edge ID. Record source file/version/as-at with imported or quoted evidence; no live cross-workbook formula is assumed.
Change trigger	New or expanded system/tool access, or a material model, data, interface, purpose or agent change: log the map change, obtain owner reassessment and escalate to the proper AIG-DEC-04 gate/AIG-DEC-03 decision when required.
Validation before use	The INTEGRATION INV-04 DEC-04 tab in this workbook is current supporting design guidance (not historical) and holds the detailed join notes. Controlled owners must reconcile real records, validate values and formulas in Excel, and approve migration/cutover; existing Council records remain unchanged until then.
