AIG-INV-04 | Using the simplified AI Register

Status	Draft for Council review — unpopulated design draft; not adopted policy or an operational replacement.
What AIG-INV-04 answers	Which system is governed, who owns it, its permitted purpose and its current position. The summary and evidence index are tabs inside AIG-INV-04, not separate playbook artefacts.
Where detail lives	Priority/risk/agent triage remain in AIG-ASS-01/AIG-ASS-02/AIG-AGT-02/AIG-AGT-03. The proposed standalone Capabilities and System Map (candidate AIG-INV-05) joins by controlled AIR-ID; AIG-AGT-04/AIG-AGT-05 remain authoritative for per-agent scope/authority. Assessment summary and Evidence index are tabs within AIG-INV-04, not separate playbook artefacts.
Decision boundary	SYSTEM BASELINE ONLY. Approval / operational status here applies to the governed system baseline and is not permission for any UC-ID. Verify the exact UC-ID, scoped decision and conditions in AIG-DEC-03 / approved minutes and dated AIG-DEC-04 event. Reconcile to the separate use-case current view.
ID / cross-file join	Use only the controlled AIR-ID issued through governance. Enter the same AIR-ID in AIG-DEC-04. No live cross-file formula or invented ID is used.
Ownership	Service Owner supplies case facts; technical and specialist owners supply their evidence; Governance maintains and reconciles the Register.
Before migration	Agree the revised field list with the owners of the Council's existing (pre-suite) AI register before any migration. Reconcile every existing register field and actual record, keep history, test in Excel, approve a cutover and retain the existing records. No source data was migrated into this draft.
Status field names	Governance Approval Status (column H) and Operational Status (column I) are the fields named in AIG-INV-01, AIG-OPS-01 and Playbook §3.6/§3.7. Allowed values — Governance Approval Status: Pending, Approved, Approved with conditions, Rejected, On hold, Suspended, Superseded. Operational Status: Not live, Active, Suspended, Decommissioned. 'Approved (or Approved with conditions) and Active' describes the system baseline only; a use is authorised only by its UC-ID decision in AIG-DEC-03.
Outcome mapping	Governance Approval Status ↔ AIG-DEC-03 outcome: Pending ↔ Pending; Approved ↔ Approved; Approved with conditions ↔ Approved with conditions; On hold ↔ Deferred; Rejected ↔ Rejected; Suspended ↔ Suspended; Superseded ↔ Retired (replaced by another AIR-ID). AIG-DEC-04 gate outcomes map to the same list on its Lists sheet.
§3.7 minimum fields	AI Register: AIR-ID, name, purpose/boundary with UC-ID(s) covered (P), service area, Service Owner, supplier/source, capability/tools permitted (Q), lifecycle stage, dates registered/first used (R, S), Governance Approval and Operational Status, personal/special category data (T), ATRS requirement (U), Model Card completion (V), monitoring in place (W), last/next review (X, N), route (Y), intake type (Z). Assessment summary: AGPI score (O), Effective Governance Priority (B), inherent risk (P), control effectiveness (Q), residual risk (R) and risk tier (D), DPIA (H) and EIA (I) positions. Gate decisions, conditions and events stay in AIG-DEC-03/AIG-
ID conventions (Proposed — for Council confirmation)	AIR-ID: AIR-nnnn, issued only by governance, never reused (format check warns). UC-ID: UC-nnnn, unique across the Council (not per AIR-ID). Suggested prefixes: EV- Evidence ID; RCH- Register Change ID; PLN- Plan ID; EVT- Event ID; CND- Condition ID; MED- Map Edge ID; MCH- Map Change ID. Enter one ID per cell where a join is needed.
Row checks	Row checks are prompts, not approvals. Anything other than the pass text is highlighted amber: resolve it against the source record before relying on the row.
Evidence for screening by reference	Evidence index columns M to O hold the date an assessment was completed or last reviewed, its review due date and, for one over 12 months old, its owner's still-holds review ref. An assessment can be cited by reference only if it is Accepted, completed or reviewed within 12 months and its review date has not passed (Playbook §4.6); the row check flags the rest. Proposed — for Council confirmation.
Information asset link (v3.9.10)	Column AA holds the reference of the matching entry in the Council's Information Asset Register. The Information Asset Owner is recorded there and is not repeated here, so each fact has one source. Leave it blank only where the system has no information asset entry yet, and ask the records manager or DPO to create one. Proposed — for Council confirmation.

AIG-INV-04 / AI REGISTER — CURRENT POSITION

DRAFT PROTOTYPE · not approved for operational use. One row per governed system. Only the authorised governance process issues AIR-IDs. A status is not a decision; reconcile approval with the decision record and dated AIG-DEC-04 gate event. Columns P–Z hold the remaining Playbook §3.7 minimum fields; column AA links the system to the Council's Information Asset Register. The Row check (O) covers them.

AIR-ID	System name	Purpose and boundary	Service area	Service Owner	Supplier / source	Lifecycle stage	Governance Approval Status (system baseline; not use-specific)	Operational Status (system baseline)	Can it act?	Decision record ref	Latest gate Event ID	Assessment / evidence ref	Next review	Row check	UC-ID(s) covered — approved purpose and scope (one per line or AIG-DEC-03 ref)	AI capability and systems/tools permitted (pointer)	Date registered	Date first used	Personal / special category data?	ATRS requirement	Model Card completion	Monitoring in place?	Last review date	Route / pathway	Intake type	Information asset reference

AIG-INV-04 / ASSESSMENT SUMMARY

A current, brief pointer to the existing AIG-ASS-01, AIG-ASS-02, AIG-AGT-02/AIG-AGT-03 and specialist records. This is not a new assessment or a gate decision. One row per AIR-ID; verify against the source. Risk values are system-level summaries (highest applicable UC-ID or the shared baseline); per-UC-ID values stay in AIG-ASS-02 and the UC-ID current view.

AIR-ID	Effective Governance Priority (AIG-ASS-01, after any authorised override)	AIG-ASS-01 ref / date	Risk tier (AIG-ASS-02; highest applicable UC-ID or	AIG-ASS-02 ref / date	Agency tier (AIG-AGT-02/AIG-AGT-03)	AIG-AGT-02/AIG-AGT-03 ref / date	Privacy / DPIA position	Equality / EIA position	Other specialist finding refs	AIG-AGT-04 Agent Record ref	AIG-AGT-05 Authority Graph ref	AIG-OPS-02 Monitoring ref	As-at date	AGPI score (0–100, AIG-ASS-01)	Inherent risk score (L × I)	Control effectiveness (1–5)	Residual risk score	Decisions about individuals — Art 22A flag / AIG-OPS-04 tier	Latest priority-override Event ID (AIG-DEC-04)	Reconciled on	Row check

AIG-INV-04 / EVIDENCE INDEX

Pointers only: retain original assessments, advice, tests and approved decisions in their authoritative locations. Never infer acceptance from a linked file.

Evidence ID	AIR-ID	Artefact / record	Type / subject	Version / as-at	Owner / author	Status	Location / link	Notes	Event ID (AIG-DEC-04)	Condition ID (AIG-DEC-04)	Row check	Completed / last reviewed	Review due	Still-holds review ref (if over 12 months old)

AIG-INV-04 / REGISTER CHANGE LOG

Record material changes to identity or current state. Do not replace the dated AIG-DEC-04 gate-event history.

Register Change ID	AIR-ID	Date	Changed by	Fields / old value	New value / reason	Authorised by / ref	Notes	Row check

AIG-INV-04 — Document Control

Controlled working template. Draft for Council review; not Council-adopted and not effective until formally approved.

Field	Controlled value
Document ID	AIG-INV-04
Artefact	AI Register (proposed simplified design)
Version	1.2 draft
Status	Draft for Council review
Document owner	AI Governance Lead (operational custody); Service Owners accountable for system facts
Approving body	Competent Council authority under Constitution and Scheme of Delegation; AI Assurance Board provides assurance where applica
Approval date	Not yet approved
Effective date	Not yet effective
Next review date	To be set on approval: 12 months after effective date or sooner following material change
Classification	OFFICIAL

Change history

Version	Date	Change	Author / owner
1.0 draft	29 September 2026	First controlled version with document control. QA remediation — applied findings QA-024, QA-063, QA-100, QA-130, QA-211, QA-233, QA-234, QA-238, QA-251, QA-267, QA-268, QA-291 (see QA change log).	AI Governance Lead
1.1 draft	3 October 2026	v3.9.8: Evidence index gains Completed / last reviewed (M), Review due (N) and Still-holds review ref (O), so the 12-month test for screening by reference (Playbook §4.6) can be checked; the row check flags a passed review date, and an Accepted entry over 12 months old	AI Governance Lead
1.2 draft	12 October 2026	v3.9.10: AI Register gains column AA, Information asset reference, linking each system to the Council's Information Asset Register; the asset owner stays in that register. The row check counts column AA. READ ME explains the link. Existing columns A to Z unchanged. Proposed	AI Governance Lead
