AI Governance Reporting Templates
The Council · AI Governance Playbook (Level 5 document, §6.9)

This pack contains the three governance reporting templates: the AI Assurance Board Report (strategic, periodic), the AI Governance Working Group Report (operational coordination), and the Exception / Escalation Report (between cycles). The companion AI Governance Dashboard provides the supporting indicators. Reports should be accurate, proportionate, timely and focused on matters requiring attention (§6.9.1). All figures must use the controlled Dashboard definitions: record the data cut-off, source and extract/version, distinguish blank from zero, reconcile system (AIR-ID) totals to the controlled AI Register (AIG-INV-04) and use (UC-ID) totals to the controlled UC-ID records linked to it, and obtain an independent preparer/checker review before circulation.

Reporting unit and reconciliation — show systems by AIR-ID and uses by UC-ID separately. For each use, report evidence-backed priority, risk, delegated outcome/conditions, monitoring and incidents with source/as-at references; disclose unknown/unverified/conflicting states separately. A system Approved/Active count, map, checklist or recommendation is not a count of approved uses. Do not duplicate a single bundled decision as multiple decision events.

Template	Audience	Cadence (suggested)
Board Report	AI Assurance Board	Quarterly
Working Group Report	AI Governance Working Group	Quarterly
Exception / Escalation Report	Relevant governance body	As required

AI ASSURANCE BOARD REPORT

Strategic oversight report (§6.9.6). Keep it concise and evidence-based; focus on the overall risk landscape, governance performance and matters needing strategic attention or a decision.

1. Report Details

Reporting period	
Prepared by	AI Governance Lead
Date	
Distribution	AI Assurance Board
Data as at	Date and time of the controlled data cut-off
Controlled source(s) and extract/version	AI Register, Dashboard and incident/action sources with version or extract ID
Metric definitions version	Controlled Dashboard / reporting-definition version used
Checked by / date	Independent checker name, role and date
Reconciliation status and exceptions	Reconciled / Not reconciled; explain every difference and treatment
Blank / zero confirmation	Confirm blanks were not treated as zero unless evidenced

2. Executive Summary

Key messages, overall position, and any decisions sought from the Board

3. AI Portfolio Overview

Measure	This period	Last period
AIR-IDs with at least one authorised UC-ID in operation		
UC-IDs awaiting delegated decision		
New AIR-IDs registered		
AIR-IDs fully retired (all UC-IDs closed/retired)		
UC-IDs with overdue reviews (E.6)		
High/Critical UC-IDs without current monitoring evidence (E.6)		
UC-IDs outside approved performance, fairness or drift thresholds (E.6)		
UC-IDs requiring reassessment after breach or material change (E.6)		
Open High/Critical post-deployment risks (E.6)		
Largest dependency concentration (model, data asset, interface/tool or supplier) and High/Critical UC-IDs relying on it (M-16, AIG-AIMS-10; source AIG-INV-05) (Proposed — for Council confirmation)		

4. Risk Landscape

Risk tier	Number of UC-IDs at this risk tier	Change since last period
Critical		
High		
Medium		
Low		

Commentary on material risks and emerging concerns

5. Governance Performance and Assurance

Governance performance, assurance outcomes, compliance status and any audit findings

6. Significant Incidents and Emerging Risks

Critical or High incidents this period, lessons learned, and emerging risks

7. Responsible AI and Governance Maturity

Progress on Responsible AI principles, governance maturity and capability development

8. Decisions and Actions Required

Decision / action sought	Owner	By when

AI GOVERNANCE WORKING GROUP REPORT

Operational coordination report (§6.9.5). Covers new use cases, risk and monitoring outcomes, compliance and incident trends, and items to escalate to the Board.

1. Report Details

Reporting period	
Prepared by	
Date	
Distribution	AI Governance Working Group

Reporting period	
Data as at	Date and time of the controlled data cut-off
Controlled source(s) and extract/version	AI Register, Dashboard and incident/action sources with version or extract ID
Metric definitions version	Controlled Dashboard / reporting-definition version used
Checked by / date	Independent checker name, role and date
Reconciliation status and exceptions	Reconciled / Not reconciled; explain every difference and treatment
Blank / zero confirmation	Confirm blanks were not treated as zero unless evidenced

2. New AI Use Cases

System / AIR-ID + UC-ID / use	Service area	Initial tier / AGPI

3. Risk Assessment Outcomes

Risk assessments completed this period and notable outcomes or reclassifications; assessor consistency result from the quarterly moderation sample, with any whole-band differences reviewed (M-17, AIG-AIMS-10) (Proposed — for Council confirmation)

4. Monitoring and Compliance

Minimum portfolio indicators (Playbook Appendix E.6) — fixed rows; use the controlled Dashboard measure definitions (AIG-OPS-06)

Measure	This period	Last period
UC-IDs with overdue reviews (E.6)		
High/Critical UC-IDs without current monitoring evidence (E.6)		
UC-IDs outside approved performance, fairness or drift thresholds (E.6)		
UC-IDs requiring reassessment after breach or material change (E.6)		
Open High/Critical post-deployment risks (E.6)		

Monitoring results, performance against thresholds, and compliance activities

5. Incident Trends

Severity	Opened this period	Closed	Still open
Critical			
High			
Medium			
Low			

Themes, recurring issues and any systemic concerns

6. Assurance Findings and Policy Implementation

Assurance findings, outstanding actions and progress on policy implementation

7. Items to Escalate to the Board

Matter	Why escalating	Recommendation

EXCEPTION / ESCALATION REPORT

For significant matters that cannot wait for the next reporting cycle (§6.9.8): significant incidents, material compliance failures, emerging high-risk issues, major performance deterioration, reputational concerns or regulatory enquiries.

1. Details

Date raised	
Raised by	
AIR-ID + affected UC-ID(s)	AIR-XXXX + affected UC-ID(s), or Unknown pending verification
Escalated to	Working Group / Board / Executive
Urgency	Routine / Urgent / Immediate
Data as at	Date and time through which facts and impacts are current
Evidence source(s) and version/date	Controlled records, logs, reports and correspondence relied upon
Facts checked by / date	Independent checker name, role and date
Reconciliation / uncertainty	Record reconciliation performed and any unresolved uncertainty or data gap

2. The Matter

What has happened or is emerging, and why it requires escalation now

3. Impact and Risk

Actual or potential impact on residents, services, compliance or reputation

4. Recommended Action

Recommended response and any immediate measures already taken

5. Decision

Decision/outcome for each affected UC-ID	
Decided by	

Decision/outcome for each affected UC-ID	
Date	
Follow-up / review date	

Document control
Administrative control record. This artefact remains a working draft until formally approved.

Field	Controlled value
Document ID	AIG-OPS-05
Version	1.8 draft
Status	Draft for Council review
Document owner	AI Governance Lead
Approving body	Pending — competent Council authority under confirmed Constitution / Scheme of Delegation; AI Assurance Board provides assurance only unless formally delegated.
Approval date	Not yet approved
Effective date	Not yet effective
Next review date	To be set on approval: 12 months after the effective date, or sooner following material change
Classification	OFFICIAL

Change history

Version	Date	Change summary	Owner
1.0 draft	6 August 2026	Document-control baseline established following full-suite quality assurance; no substantive content change.	AI Governance Lead
1.1 draft	6 August 2026	QA revision: added data-cut, source, checking and reconciliation controls to each report.	AI Governance Lead
1.2 draft	14 September 2026	Corrected the Board report section heading from ‘AI Governance Board’ to ‘AI Assurance Board’ to match the governance body named throughout the suite. No other change.	AI Governance Lead
1.3 draft	29 September 2026	QA remediation — applied findings QA-100 (part), QA-101, QA-102 (part), QA-172, QA-185, QA-221 (see QA change log). Working Group report cadence aligned to quarterly; Appendix E.6 minimum indicators added as fixed rows to the Board and Working Group reports; UC-ID reconciliation wording. Final tidy-up: self-referencing cross-reference removed from the standards row(s) REQ-009, REQ-011, REQ-038.	AI Governance Lead

Version	Date	Change summary	Owner
1.4 draft	30 September 2026	v3.9: Board Report section 3 adds the largest dependency concentration and the High/Critical UC-IDs relying on it (M-16, AIG-INV-05); Working Group Report section 3 adds the assessor consistency result (M-17, AIG-AIMS-10) (Proposed — for Council confirmation). Board Report M-16 row names model, data asset, interface/tool or supplier and cites AIG-AIMS-10 (source AIG-INV-05).	AI Governance Lead
1.5 draft	30 September 2026	v3.9.1: standards cross-reference note updated to the 54-entry requirement inventory (AIG-AIMS-05 REQ-054, Civil Contingencies Act 2004, added).	AI Governance Lead
1.6 draft	1 October 2026	v3.9.3: standards cross-reference note cites the 55-entry requirement inventory (AIG-AIMS-05 REQ-055, NIST AI 600-1 Generative AI Profile, added).	AI Governance Lead
1.7 draft	2 October 2026	v3.9.5: standards cross-reference note cites the 56-entry requirement inventory (AIG-AIMS-05 REQ-056, SI 2026/425 ICO statutory code of practice on AI and automated decision-making, added). Proposed — for Council confirmation.	AI Governance Lead
1.8 draft	12 October 2026	v3.9.10: standards cross-reference note cites the 58-entry requirement inventory (AIG-AIMS-05 REQ-057 DAMA-DMBOK and REQ-058 ISO/IEC 5259, added as voluntary data governance references). Proposed — for Council confirmation.	AI Governance Lead

PROPOSED INTEGRATION ADDITIONS — REVIEW REQUIRED

Proposed map reporting control

Any portfolio metric using AIG-INV-05 must define the verified relationship population, source/as-at date and treatment of Proposed, Unknown, stale or unverified links. Zero confirmed links means “not mapped or not confirmed,” not “no capability/system exists.” Do not infer approval, implementation, completeness or risk from map coverage; reconcile AIG-INV-04 state and AIG-DEC-04 dated events separately.

This integrated draft includes revisions to body content above; the annex below is supplementary proposed content for Council review. This draft and annex do not record live facts, completed actions, delegated authority, Council adoption or approval.

PROPOSED extract, reconciliation and interpretation definitions

Each report states reproducible data cut-off (date, time, time zone), source, extract/snapshot identifier and version, extraction date, metric-definition version, preparer and independent checker. Later corrections are restatements or subsequent-period changes, not silently backdated.

Use AIG-INV-04 as authoritative for system identity/current governance and operational state. Reconcile to a dated AIG-INV-04 extract at AIR-ID level: state population and status filters; compare row counts and unique AIR-IDs; identify duplicates, missing IDs and status mismatches; list exclusions and reasons. Reconcile event measures to dated AIG-DEC-04 and controlled incident/action sources, documenting joins, time window, event-date field and deduplication.

For differences report expected and extracted totals, variance, affected records/AIR-IDs, reason, owner, treatment and disposition/date. Mark “not reconciled” if a material difference remains; do not force totals to agree. Checker records scope, name/role/date and is independent of preparation.

Blank, unknown, not supplied, not applicable, not yet assessed and zero are distinct. Zero means a measured count of none in a defined population/period and requires a complete valid extract. Blank/missing is never imputed as zero; disclose missingness and its impact. Use N/A only with reason.

PROPOSED measure dictionary fields

For each metric define name/purpose, numerator, denominator/population, inclusion/exclusion, point-in-time or period basis, date field, source/version, aggregation/deduplication, treatment of blank/unknown/N/A, rounding, owner and effective date. Reference controlled Dashboard definitions by version.

Review points — not yet decided

Confirm approved extract mechanism, snapshot convention, time zone, reconciliation materiality/escalation thresholds, correction/restatement process and checker-independence criteria. No figures or live reconciliation are supplied.

Standards and legal applicability — proposed QA cross-reference

PROPOSED QA INDEX — NOT APPROVED LEGAL ADVICE OR EVIDENCE OF COMPLIANCE. The listed instruments may be relevant to this artefact, but applicability depends on the case, service and Council delegation. Legislation, official guidance, Council policy and voluntary standards are different authority classes. The full 58-entry requirement inventory, authoritative URLs, validation owners and current versions are in AIG-AIMS-05; source checks are in AIG-AIMS-13. Do not treat a template, plan or cross-reference as completed assessment, adopted policy, ISO conformity or legal sign-off.
