

AIG-ASS-02_AI_Risk_Assessment_Worksheet_Proposed.xlsx

Worksheet and field-heading reference only. The workbook retains its formulas, validations and working rows. This page is not an approval record.

Risk Assessment

Section (row 5): Triage context — pre-populated from the canonical web triage record

Fields (rows 6–15): System / model name · AIR-ID · Purpose / description · Service area · Service owner · Triage date · AGPI score (0–100) · Raw AGPI priority · Effective governance priority · Risk assessment scope

Section (row 16): Assessment ownership — completed by the assessor

Fields (rows 17–20): Assessed by · Assessment date · Evidence bundle / case reference · UC-ID / use outcome assessed

Fields (row 20 C): Scope-key check

Section (row 21): Step 1 — Impact: confirm or amend triage scores (1 Minimal to 5 Severe)

Header row 22: Impact dimension · Triage score · Confirmed score · What it covers

Row labels (rows 23–28): Resident Impact · Legal & Regulatory Impact · Reputational Impact · Operational Impact · Financial Impact · Impact score (I) — highest confirmed dimension

Section (row 30): Step 2 — Likelihood and control effectiveness: confirm or amend triage scores

Header row 31: Metric · Triage score · Confirmed score

Row labels (rows 32–33): Likelihood (L) · Control Effectiveness (C)

Section (row 35): Step 3 — Risk results and governance floor

Header row 36: Result · Triage result · Confirmed / calculated result · Rule / note

Row labels (rows 37–45): Inherent risk score ($L \times I$) · Inherent risk tier · Control effectiveness factor ($C \div 5$) · Residual risk score · Residual risk tier · Mandatory risk floor · Effective governance tier · Tier floor rationale · Assurance intensity

Fields (rows 37–41 D): Controls evidenced? · Control evidence ref · Independent check? · Verification ref · Reduced tier eligible?

Section (row 47): Step 4 — Mandatory escalation triggers: confirm the triage answers

Header row 48: Trigger · Triage answer · Confirmed answer · Governance effect

Row labels (rows 50–56): Processing of special category personal data (UK GDPR) · Use in relation to vulnerable residents (children, adults with care/support needs, people... · Directly influences housing allocation, social care assessments or homelessness preventio... · Novel or first-of-type AI deployment with no prior Council operational experience · Produces or directly informs statutory decisions · Significant AI supplier or model changes that materially alter the risk profile of an exi... · Executes actions autonomously without human review of each individual action

Fields (rows 58–62): Mandatory escalation required · Minimum tier from triggers · Effective governance pathway · Governance Decision Record / uplift rationale · Core deployment control

Section (row 64): Step 5 — Agentic assessment: pre-populated where the system can act. These are the scores used for tiering; r...

Header row 65: Agentic field · Triage value · Confirmed / recorded value · Note · AIG-AGT-04 Agency Profile ref (rationale and evidence recorded there)

Row labels (rows 66–82): Is Agent (can it act?) · Consequence · Autonomy · Authority · Reach · Controllability (reversed) · Autonomy level · Agency tier · Agentic pathway · Kill-switch demonstrated · Rollback capability · Boundaries tested · Agentic flags · Agentic escalations · Agent Record (ASBOM) ref · Agentic deployment control · Agentic floor and trigger consistency (D7)

Section (row 83): Five kinds of agentic risk — professional judgement (complete where Is Agent = Yes)

Header row 84: Risk kind · Considered? (Yes/No) · Assessment note · What it means

Row labels (rows 85–89): Model risk · Agent risk · Tool risk · Environment risk · Emergent / systemic risk

Section (row 91): Step 6 — Professional judgement, evidence and treatment

Fields (rows 92–99): Key risk / failure scenario · Control effectiveness rationale · Evidence references · Residual risk rationale · Risk treatment / approval conditions · Risk / treatment owner · Next review / monitoring trigger · Assessor conclusion

Fields (rows 101–102): Overall deployment control · Assessment status

Document Control

Front matter, summary or instructions; see the editable workbook.

Triage Import

Header row 4: Canonical field · Value · Capture status · Used in AIG-ASS-02 · Implementation note

INTEGRATION INV-04 DEC-04

Header row 5: Integration relationship · Native source / artefact · Native record locator · Join key(s) · Proposed integration rule / use · Required provenance: row, version, as-of · Blank / zero handling · Reporting / audit reconciliation

STANDARDS SCOPE QA

Header row 2: Requirement ID · Instrument / edition · Conditional scope / relevance · Source URL · Owner validation status

MAP & SPLIT CONTRACT
