

ATRS Record Template

The Council · AI Governance Playbook (Level 5 document, §3.7)

Internal pre-draft working aid aligned to the UK Algorithmic Transparency Recording Standard (ATRS).

This Council artefact is a pre-draft mapping aid, not a publishable ATRS record. At the QA date it is mapped to the UK Government ATRS version 4. Before publication, verify the current standard and guidance, then transfer the content into the current, unaltered official GDS / gov.uk Excel or Google Sheets template; the official template is the canonical record. Complete it in clear, plain language and full sentences (Playbook §3.7).

Disclosure scope — AIR-ID (system): _____; UC-ID(s): _____; purpose/outcome and public-facing scope: _____. Link each disclosure to its supporting use-specific decision and evidence. One system record/publication does not approve other UC-IDs; publication eligibility and authority are checked separately.

Control field	Controlled value
Internal artefact status	Pre-draft mapping aid — not suitable for publication
Canonical standard at QA date	UK Government ATRS version 4 (source checked 6 August 2026)
Publication control	Transfer into the current unaltered official template and revalidate every prompt at publication
Current source verified by / date	
TIER 1 — SUMMARY INFORMATION (for the general public)	

1. Summary

Tool name	
Organisation	the Council
Description	Two to three sentences: what the tool is and why it is used
How and why it is used	
Contact email	

TIER 2 — DETAILED INFORMATION (for specialist audiences)

2. Owner and Responsibility

Senior Responsible Owner	
Service area	
External supplier / developer	If any
Procurement reference	If applicable
AIR-ID	AIR-XXXX — internal join to the Register (AIG-INV-04); not transferred to the public GDS template

3. Description and Rationale

Detailed description of how the tool works and the scope of its use

Why the tool is being used and the benefits expected; alternatives considered

4. Decision-Making Process and Human Oversight

How the tool's output is used in the wider decision-making process

Human oversight: how outputs are reviewed and how decisions can be challenged or overridden

5. Technical Specification and Data

Model type and technical specification (e.g. system architecture, type of model)

Data: sources, categories, how it was obtained, and any data sharing

6. Risks, Mitigations and Impact Assessments

Key risks identified and how they are mitigated

Impact assessments completed (tick and give reference)

☐ DPIA ☐ EIA ☐ Human Rights Assessment ☐ Bias audit ☐ Other

Assessment references	
Date of record	
Cleared for publication by	

Document control

Administrative control record. This artefact remains a working draft until formally approved.

Field	Controlled value
Document ID	AIG-ASS-10
Version	1.2 draft
Status	Draft for council review
Document owner	AI Governance Lead
Approving body	Pending — competent Council authority under confirmed Constitution / Scheme of Delegation; AI Assurance Board provides assurance and is not presumed to hold approval authority.
Approval date	Not yet approved
Effective date	Not yet effective
Next review date	To be set on approval: 12 months after the effective date, or sooner following material change
Classification	OFFICIAL

Change history

Version	Date	Change summary	Owner
1.0 draft	6 August 2026	Document-control baseline established following full-suite quality assurance; no substantive content change.	AI Governance Lead
1.1 draft	6 August 2026	QA revision: labelled the artefact as a pre-draft aid and added canonical ATRS version controls.	AI Governance Lead
1.2 draft	19 September 2026	QA revision: added an 'AIR-ID' field to Section 2 so the internal working record can be traced to the Register (05), Gate Log (36) and Monitoring & Review Log (39). Internal join only; not part of the published GDS ATRS record. No change to existing content.	AI Governance Lead

NOT APPROVED — PROPOSED INTEGRATION ANNEX
Integration annex — Internal ATRS preparation and release boundary
DRAFT FOR COUNCIL REVIEW • 25 September 2026 • Not approved for operational use
Internal mapping aid only

This remains an internal pre-draft mapping aid, not the canonical GDS/government ATRS record and not a public record. Before any proposed external use, an authorised owner must verify the then-current official standard/template and each prompt, prepare the canonical record, complete required privacy/security/legal review, and obtain separate publication authority under Council process. This annex does not approve or announce publication.

Internal identifiers and evidence

Use AIR-ID only after it is registered in AIG-INV-04; keep the identifier as an internal join, not public-template content. Retain the ATRS mapping aid and its sources in their native records, using the proposed AIG-INV-04 Evidence Index Evidence ID with source/version, date and controlled location. Do not include confidential or personal material in a public-facing record merely because it is indexed internally.

Decision, monitoring and changes

Any authorised publication or non-publication decision must be recorded in AIG-DEC-03 or authoritative forum minutes; AIG-DEC-04 may only point to an actual dated Gate Event or Condition (ID/date), never serve as the publication decision. Maintain accuracy against current system state in AIG-INV-04 and AIG-OPS-02; reassess content after supplier/model/version, scope, purpose, or affected-user changes. Link AIG-OPS-04 where it describes challenge arrangements, without asserting that an individual case or route has been completed. If agentic capability is described, reconcile the action scope to exact AIG-AGT-04 ASBOM permissions/version, use AIG-AGT-05 only as the derived view, and AIG-AGT-06 for relevant action records; none establishes publication or authority.

Draft status

No current ATRS version, legal applicability, completed system facts, approval, or public release is represented by this annex. The retained template's public-facing fields remain uncompleted until authorised review.

Standards and legal applicability — proposed QA cross-reference
PROPOSED QA INDEX — NOT APPROVED LEGAL ADVICE OR EVIDENCE OF COMPLIANCE. The listed instruments may be relevant to this artefact, but applicability depends on the case, service and Council delegation. Legislation, official guidance, Council policy and voluntary standards are different authority classes. The full 51-entry requirement inventory, authoritative URLs, validation owners and current versions are in AIG-AIMS-05; source checks are in AIG-AIMS-13. Do not treat a template, plan or cross-reference as completed assessment, adopted policy, ISO conformity or legal sign-off.

Requirement / instrument	Why check it here	Source
REQ-009 — Freedom of Information Act 2000 (FOIA)	Screen the legislation requirement against this artefact's actual use and record evidence/version; see REQ-009.	https://www.legislation.gov.uk/ukpga/2000/36/contents
REQ-036 — Algorithmic Transparency Recording Standard (ATRS)	Central-government mandatory scope is distinct from proposed local-authority adoption.	https://www.gov.uk/government/publications/guidance-for-organisations-using-the-algorithmic-transparency-recording-standard/algorithmic-transparency-recording-standard-guidance-for-public-sector-bodies
