Measurement Plan

Header row 1: Ref · What is measured (indicator) · Why it matters / links to · Method / source · Frequency · Baseline · Target · Owner · Analysis & evaluation (who, when) · Reporting period · Latest result · Evaluation (on / off target) · Evidence location (e.g. AIG-OPS-06, AIG-OPS-02)

- M-01:** Proportion of live AI systems recorded in the AI Register
- M-02:** Proportion of registered systems with required assessments complete for their tier
- M-03:** Systems deployed with all governance gates cleared
- M-04:** Time from intake to governance decision
- M-05:** AI objectives on track
- M-06:** Open nonconformities and overdue corrective actions
- M-07:** Internal audits completed vs planned
- M-08:** AI incidents by severity, and time to contain
- M-09:** Post-deployment monitoring in place for high-risk systems (bias, drift, performance)
- M-10:** Competence and awareness coverage for AIMS roles
- M-11:** Applicable-requirements validated and change items actioned
- M-12:** Live AI systems with overdue monitoring reviews
- M-13:** Governance conditions open past their due date
- M-14:** Systems outside approved performance, fairness or drift thresholds
- M-15:** Systems requiring reassessment after threshold breach or material change
- M-16:** Dependency concentration: the largest share of mapped AIR-IDs (components) or of AIR-IDs in the AIG-INV-04 ex...
- M-17:** Assessor consistency: share of moderation-sample assessments where the second assessor's tier matches the ori...

INTEGRATION INV-04 DEC-04

Header row 5: Integration relationship · Native source / artefact · Native record locator · Join key(s) · Proposed integration rule / use · Required provenance: row, version, as-of · Blank / zero handling · Reporting / audit reconciliation

STANDARDS SCOPE QA

Header row 2: Requirement ID · Instrument / edition · Conditional scope / relevance · Source URL · Owner validation status
